The URI Energy Fellows Program provides an opportunity for undergraduate and graduate students to gain valuable paid work experience. During this one-year fellowship students work on interdisciplinary projects at URI, and at outside energy companies, that address real-world energy challenges. In addition, Fellows receive training on specialized energy topics, leadership and communication.

Who should apply?
Students enrolled in any academic major through December 2018 may apply. Those with a passion for sustainable energy and the ability to produce high quality work will be selected.

When does the program start & how many hours do students work?
Energy Fellows begin work in Jan. 2018 and continue through Dec. 2018. In addition to trainings and events throughout the year Fellows work the following with their mentor:

- Spring 2018 and Fall 2018 Semesters – 10 hours/week
- Summer 2018 – up to 30 hours/week

Where do students work?
Students are selected for positions either at the URI Extension Outreach Center or with an outside company such as RISE engineering, A/Z Corp, WattSun Solar, or Energy Conservation Inc. to work on various energy related projects.

Past Energy Fellows now work with the RI Office of Energy Resources, Wind Energy Development LLC, Newport Solar and more!

How do I apply?
Visit [http://web.uri.edu/ceoc/energy-fellows-program](http://web.uri.edu/ceoc/energy-fellows-program) to download the application and submit the cover page. Submit additional required items to:

Kaylyn Hawkes Keane
URI Outreach Center
3 East Alumni Ave
Kingston, RI 02881

Applications will open for 2018 in September 2017
