People Soft Supported Browsers

Staff members with any other combination of Platform/OS Level/Browser Levels than what is in the matrix below may or may not experience some compatibility issues with existing PeopleSoft Application at the University. For example, Firefox 10 has not been certified for PeopleSoft, yet many staff members will upgrade because it is one of the most current versions.

Please **DO NOT update** your Web Browser before discussing with your Department Manager or Information Technologist. Downloading browsers that are not certified may limit our ability to resolve application issues with PeopleSoft support, but it does not indicate that version will not work with PeopleSoft.

**UCS strongly recommends that each PeopleSoft customers have two different browsers on their desktop for possible PeopleSoft application compatibility issues.**

- Mac users should have Safari and Fire Fox
- PC clients should have Firefox and IE.
