The famous and beloved chrysanthemum bonsai went missing on Sunday, March 26, 2017 from the Rhode Island Horticultural Museum.

The Rhode Island State Police have identified five subjects. They asked 20 investigation units to help crack the case.

From the crime scene, they have collected fingerprints, shoeprints, blood droplets, and hairs/fibers/pollen. Work through four labs and compare the suspect profiles with evidence gathered from the crime scene.

- Shoeprint Lab
- DNA Electrophoresis Lab
- Trace Evidence Lab
- Fingerprint Lab
