| 11:15 AM | Tim Henry       | Computer Science | Tools and Pedagogy for Online and Hybrid Courses  
Covers designing an online or hybrid course that is student centered with a web site that gives students information and direct access to tools. Lessons learned from the "Flipped Classroom" hybrid model. |
| 11:35 AM | Yonathan Friesem | Education | Experiential learning with Google Drive  
The presentation will show the use of Google Drive Apps as a learning tool to enhance students’ collaboration. Using demonstrations and presentation the participants will learn educational techniques to use Google Drive apps in their classroom and group projects as well as online exams. |
| 11:55 AM | Mary Fetherston | ITS MTS | Gathering Data: An easy alternative  
A quick presentation of the benefits and pitfalls of using Google Drive to create an easy web form to contact and elicit data from students, faculty, staff or the community. |
| 12:15 PM | Cheryl McCarthy | GSLIS | WebEnhanced Content Management for Courses and Access to Library Resources  
This presentation will illustrate practical uses for Libguides, a content and knowledge management system. This presentation will show how Libguides can be adapted for use as a dynamic teaching tool for college courses. Attendees will be able to browse Libguides created for a variety of college courses learn how digital media can be included to create a collaborative learning environment. Discussion will center on the use of Libguides for creating interactive, collaborative web spaces for supporting teaching and learning in the 21st century. |
| 12:35 PM | Amanda Izenstark | Library | Supporting Students We Never See  
Students across the disciplines - and around the world - contact us via our live chat widgets embedded in article databases and LibGuides for instant online research assistance. Hear how we're helping students conduct better online research, find scholarly articles efficiently, and submit better work, regardless of their physical location. |
| 12:50 PM | Jim Kinnie      | Library | InfoRhode Tutorials  
Learn basic library research in these short video tutorials |
| 1:05 PM  | Tina Yetman     | ITS UCS | Academic Advising - The Enrollment Backpack  
Enhancements to improve the academic planning and advising process include an enrollment backpack and new ‘what-if’ capabilities. |
| 1:20 PM  | James Baglama   | Math | Online General Education Math Course  
We developed engaging online activities that strengthens the communication between instructor and online student. The activities will help facilitate the learning of complex math problems in general education math courses. We also designed and created online learning videos and web pages for mobile devices. |
| 1:40 PM  | Brenda Bravener | CourseSmart | “Successfully Implement an eText Digital Strategy by Leveraging Your Campus Learning Management System”  
Deploying a digital eText strategy within the campus ecosystem can prove challenging if there is no clear vision. With quality of education and student success becoming influenced more and more by content access, efficiency and scale – especially due to the explosive growth in mobile device use – there are many factors to consider during strategy development and implementation. This presentation will focus on how the delivery of content is evolving, content delivery challenges facing institutions today, and innovative approaches used to overcome some of those challenges to successfully implement a digital solution. |
| 1:55 PM  |                 |             | NOTE: Schedule subject to change. |
