

SRI 4-H Fair 2012

Poultry Knowledge Test: Novice Study Guide

Name: _____ 4-H Age: _____ Club: _____

Fill In The Blank:

Egg Production	Crop	107 degrees	Shell	Dorkings
----------------	------	-------------	-------	----------

1. The shell is the egg's first line of defense against bacterial contamination.
2. The crop is located in the neck region and stores food until the bird is ready to digest it.
3. A chicken's body temperature should be 107 degrees Fahrenheit.
4. Dorkings are a rare example of a bird with red ear lobes that lays white eggs.
5. Leghorns are known for their egg production.
