Angus Taylor is President and Chief Executive Officer of Hexagon Manufacturing Intelligence, North America, based in North Kingstown, Rhode Island. The company designs and manufactures three-dimensional, high precision measurement systems in two modern facilities in Rhode Island and California. Hexagon Manufacturing Intelligence distributes and supports the most extensive product portfolio in the industry. More than one hundred industries apply Hexagon Manufacturing Intelligence solutions to a wide variety of manufactured parts, assemblies and applications.

Mr. Taylor studied mechanical engineering at the University of Central Lancashire, formerly Preston Polytechnic, in the UK. In 1987, Taylor shaped his career with increasing levels of responsibility in technical and commercial business disciplines and assumed international business roles prior to becoming President and CEO of Hexagon Manufacturing Intelligence in 2008. In 2015 Angus Taylor was awarded the Honorary Doctor of Business degree in recognition for his leadership in business and engineering as well as his extraordinary commitment to advancing language immersion programs within public schools.
