Brian Schwarz joined the University of Connecticut, School of Engineering as the Director of Advising in August 2007. In Brian’s tenure in this position, he created the Eurotech and Engineering House Living Learning Communities in 2008 and 2011, respectively. He became the Co-Director of the Eurotech Program in 2012 and has developed three new International Engineering Programs in 2015, 2017 and 2018, respectively: Engineering Spanish Program (ESP), the AsiaTech program in Shanghai, China and Techopole France in Toulouse, France. In February 2017, he assumed the role of Director of Experiential Engineering Education Initiatives and Director of International Engineering Program. In addition to continuing to lead and oversee the School of Engineering’s Living Learning Communities as well as our expanding International Engineering Education efforts, Brian is working closely with our partners in the Center for Career Development to create a robust and successful engineering co-op program.
