Niko Tracksdorf is an Assistant Professor of German the University of Rhode Island. His research and teaching focuses on interdisciplinary language teaching (especially German for professional purposes), intercultural competence, and online and blended learning. He is known for his STEM-focused German courses such as “Achterbahn – The Thrill of German Engineering” and “The Car of the Future”, and is currently working with a team of co-authors on a new intercultural and interdisciplinary beginning German textbook. In his role as Associate Director of the German International Engineering Program, he is preparing his students for international study, research, and internship opportunities in German-speaking countries.
