- To continue in the ABM program, students should maintain a minimum GPA of 3.00 overall and 3.20 in the major.
- All undergraduate major courses and at least 96 total credits must be completed by the end of Junior year.
- Students apply to the graduate program in Fall of their Junior year. The application is part of the pool of applicants for September admission the following year.
- If admitted to the graduate program, the student's fourth year of the undergrad program is also the first year of the graduate program. The 24 credits graduate students typically take in year one of the graduate program fulfill the free electives that are required to accumulate 120 credits for the BS degree. At this point, academic advising is provided by the graduate program.
- At the completion of 120 credits at the end of year 4, the student will receive the BS in CMD degree and may attend undergraduate commencement.
- ABM students must take at least 30 credits in the second year (summer, fall, spring) of the graduate program to obtain the MS degree. If there are not enough elective credits available in the MS-SLP program, they may need to take an elective outside the program to reach 30 credits.
