Please duplicate and distribute the attached forms to each student who will visit the W. Alton Jones Campus. Completed health history forms must be returned to the W. Alton Jones Campus no later than one week before the school program begins. PLEASE USE THE MOST CURRENT STUDENT HEALTH HISTORY FORM. If you have old forms from prior years, please discard them.

Enclosed:

- Letter to Parents
- Packing List
- Student Health History Form (Note: this is a two page form)
- Behavior Agreement
- Ticks and Your Child (Information Sheet)
Dear Parents,

The field teachers and staff at URI's W. Alton Jones Campus are looking forward to involving your child in an unforgettable outdoor adventure in learning.

I would like to help you understand this special event by answering some commonly asked questions. Please take a moment to read this letter, go over the packing list and complete the Student Health History form.

**What is the W. Alton Jones Campus?** URI's unique 2,300-acre wilderness area is devoted to environmental education, conservation and research. Over 40,000 acres of state parks and forests surround the Campus, making this one of the largest preserved regions in southern New England. It is home to a great diversity of mammals, birds, wildflowers and trees and serves as an outdoor school for more than 10,000 students each year.

**What are the program goals?** Our program is designed to increase students' appreciation, understanding and concern for the environment and each other. We do this through an active, hands-on, learning-by-doing process.

**What are the accommodations like?** Our kitchen is staffed with professional University of Rhode Island cooks who serve family-style meals. Our knotty pine dining lodge with fieldstone fireplaces and six meeting rooms provides a rustic, comfortable learning environment. Six winterized cabins are heated and have showers and lavatory facilities. Each cabin has bunks for sixteen to twenty students plus two to four adult chaperones.

**Who Conducts the Program?** The Environmental Education Center's own field teachers conduct the program. Our teaching staff includes college graduates, certified teachers and undergraduate interns.

**What if medical help is needed?** The Center has a nurse on-site part time and on-call 24 hours each day. Kent County Hospital in Warwick and Hasbro Children’s Hospital in Providence serve the Center. All of our field teachers are trained in CPR and First Aid.

Thank you for giving your child this educational opportunity.

Sincerely,

John Jacques
Environmental Education Center
PACKING LIST

Students will spend the majority of the daytime hours outside in all types of weather.

CLOTHING:
___ Daily change of light colored shirts
___ Daily change of underwear and light-colored socks, including warm socks (pack extra socks)
___ Sweater or sweatshirt and light jacket
___ Sleepwear
___ Daily change of light colored pants (such as jeans or cotton pants)
___ 1 rain jacket or poncho
___ Hat with visor
___ 2 pairs of sneakers; or (required for programs November through March)
   1 pair of sneakers and
   1 pair of all-purpose shoes (such as waterproof boots, hiking boots, etc.)

NOVEMBER THROUGH MARCH:
___ 2 pairs of warm gloves or mittens (wool preferred)
___ 1 pair of long underwear
___ 1 winter jacket plus an extra sweater or sweatshirt
___ 1 wool hat and scarf
___ Snow pants (if there is snow)

PERSONAL ITEMS:
___ Sleeping bag or bedding (sheets and blankets)
___ Pillow
___ Pillowcase
___ Toothpaste, toothbrush and unbreakable cup
___ Soap in a soapbox and shampoo
___ Bath towel and washcloth
___ Sunscreen/Lip balm
___ Insect repellent (stick or lotion please, no spray)
___ Comb or brush
___ Plastic trash bag for dirty laundry
___ Water bottle

OPTIONAL ITEMS:
___ Stamped envelopes, stationary, pen or pencil
___ Camera (marked with name)
___ Teddy bear or other familiar article to help at night
___ Journal and book for quiet time
___ Bandanna, Knapsack, Compass
___ Waist pack (required for those who must carry inhalers and epi-pens)

LEAVE AT HOME:
Gum, candy, soda, food, toys, baseball bats, knives, weapons, toy weapons, phones, Ipods,
money, curling irons, electronic games, flashlights, and other electric or battery operated devices.

HELPFUL HINTS
1. Mark ALL of your belongings with your name.
2. Please limit luggage to one piece, plus sleeping bag, as space is limited.
UNIVERSITY OF RHODE ISLAND W. ALTON JONES CAMPUS

STUDENT HEALTH HISTORY FORM

Dates at School Name_________________________________________Alton Jones______________________

Return this form to school by ___________________________(at least 3 weeks before Alton Jones Visit).

If your child is attending an overnight program (2-5 days) at the W. Alton Jones Campus, please complete both pages of this form. If your child requires special treatments, injections, is immune compromised, has mobility limitations (e.g. cast, crutches or wheelchair), no spleen, food allergies, dietary restrictions or other special issues, contact Alton Jones at least two weeks before the program: Medical: 401-874-8148; Dietary: email altonjones@uri.edu. Some issues will require a doctor’s note or a parent’s attendance.

NOTES TO PARENTS:

1. URI provides insurance for up to $10,000.00 per injury. Parent/guardian is responsible for additional costs.

2. If your child has had or has been exposed to a contagious disease or gets a serious cut, bruise, sprain, break, other injury or skin rash during the two weeks prior to coming to Alton Jones, please contact our nurse by phone.

3. All medications will be kept locked in the nurse’s office except Inhalers and Epi-pens/Benadryl which must be carried by participants at all times including DR EMERGENCY ACTION PLAN. (Please attach additional copy of action plan to health form and a send day pack for carrying emergency medicines).

4. All medications must be in original container and properly labeled, correlated with written instructions and placed in a ziploc bag.

5. Prescription Medication: If your child is bringing medication prescribed by a physician, the medication must be in the original container with the doctor’s orders on the container. Medications will be dispensed as specified on the container unless a physician’s note is attached indicating a change in dosage. The medication will be dispensed under the supervision of an R.N. or other authorized staff member.

6. If it is OK for staff to administer Tylenol, Benadryl, or Ibuprofen if needed, please INITIAL HERE:___________

Please note that photographs and other recordings may be made of program participants by the University of Rhode Island for its records or for public relations purposes and that attendance constitutes consent to any such recordings. For marketing purposes, contact information provided may be used for Alton Jones brochure mailings and camp/program notifications. I grant permission for the student named on this form to participate in all planned activities and programs. I understand that participation in these activities can expose my child to dangers both from known risks and from unanticipated risks. I give permission to have my child treated by the W. Alton Jones Campus nurse, authorized staff or a physician in case of severe illness or emergency in which I cannot be reached. I understand that health information provided on this form will be shared with those who will be directly caring for my child. In the event of severe misconduct, if an illness or injury should arise in which a doctor's diagnosis is required, or if it is not appropriate for my child to remain on site, I authorize the campus management to dismiss my child early, in which case I will assume responsibility for arranging transportation. I authorize those listed on this form to sign out my child upon presentation of a photo driver's license for identification. I hereby assume responsibility for all medical expenses for my child not covered by the University of Rhode Island accident insurance policy.

BEHAVIOR AGREEMENT

Student’s Name_____________________________________ School______________________ Date___________

At Alton Jones, we strive to create a caring and supportive community. We want all students to feel safe, welcomed and accepted. Following and abiding by the rules and guidelines ensures a memorable experience. Students are expected to respect themselves, others and the environment. Inappropriate behavior negatively affects everyone.

In addition to Alton Jones rules, all school rules continue to apply. Since the Alton Jones experience passes so quickly we try to deal with behavior issues before they snowball. We have developed a clear four-strike system of consequences for inappropriate behavior. It is used when a child has gone beyond acceptable limits.

1. Strike One: Student gets a warning.

2. Strike Two: Student sits out of a session and has a disciplinary meeting with the Alton Jones Coordinator or schoolteacher.

3. Strike Three: The Coordinator or teacher calls home to communicate the child’s behavior. The parent speaks with the child.

4. Strike Four: The parent must pick up the child.

The severity of the offense may demand a second, third, or fourth strike remedy. This progressive discipline System, combined with positive reinforcement, is designed to put behavior decisions in the student’s hands. It is meant to give a student plenty of chances to change. The goal is to change negative behavior in order to prevent a child from being sent home.

I know that how I act affects the experience of people around me. I have read and understand this behavior agreement. I know that proper behavior is expected of me and that if I act badly, I could be sent home. I pledge that I will follow the rules and treat others with respect.

____________________________________________________  ______________________
Student Signature                                           Date

I have read and understand the behavior agreement as outlined. I understand that proper behavior is expected and that inappropriate behavior could potentially lead to my child being sent home and that no refund will be given. I understand that in addition to not following rules, a child may be sent home if they are acting or talking about acting in a way that is physically or emotionally unsafe to themselves or others. I have discussed this behavior agreement with my child and have impressed upon him/her the importance of following the rules and behaving appropriately.

Ticks and Your Child

Blacklegged ticks, also known as deer ticks (Ixodes scapularis), which can carry Lyme Disease as well as the less common Human Granulocytotropic Anaplasmosis (HGA) and Babesiosis, are prevalent in Rhode Island. Disease carrying ticks have been found in 43 states and are common in many parts of the Northeast. Caution is appropriate for anyone spending time in the outdoors. Here are answers to some commonly asked questions about ticks.

**What is the likelihood of my child getting a tick-borne disease at Alton Jones?** Spending time outside in natural areas increases the possibility of getting a tick-borne disease. We work diligently to minimize risks and provide maximum protection for each child. We feel it is important to keep parents informed so that if a child displays symptoms, a prompt diagnosis can be made and proper treatment can be given.

**What measures are taken to prevent tick bites?** At W. Alton Jones we take a proactive approach. We teach children to be aware of ticks and methods of tick-bite prevention. We talk to them about ticks at their first orientation meeting. We teach them how to check themselves for ticks and frequently remind them to do so. We work to keep our trails trimmed and we make every effort to avoid high-tick areas.

**What if a tick bites my child?** In the event that an embedded tick is found on a child, a trained staff member will promptly remove the tick. It is possible for an infected tick to be embedded for up to 48 hours before transmitting a disease. Prompt tick removal will reduce the likelihood of disease transmission. We call parents of any child who is bitten by a tick so that they can monitor the child for symptoms once they are home.

**What are the symptoms of tick-borne diseases?** We encourage all parents and children to become familiar with the symptoms since a tick bite can go undetected. If any symptoms occur, contact your doctor and tell them that your child may have been exposed to ticks. Many symptoms are flu-like while tick-borne diseases are most likely to occur outside of the normal flu season.

- **Lyme Disease**: Early symptoms generally appear within a week and include an expanding (often but not always bulls-eye shaped) skin rash that can be, but is not always, near the bite site. The rash occurs in 60% to 80% of all cases, appears 3 days to 1 month after the bite, and confirms a diagnosis of Lyme Disease. Also watch for chills, fever, headache, stiff neck, fatigue, swollen lymph nodes, dizziness and aching joints and muscles. Another possible symptom is swelling and pain in the joints, especially the knees. These symptoms may not seem serious enough to warrant initial concern. Lyme Disease is the most common tick-borne disease and is treatable with antibiotics.

- **Human Granulocytotropic Anaplasmosis (HGA)**: Symptoms include fever, headache, malaise, chills, sweating, muscle aches, nausea and vomiting. Symptoms may be severe and it is sometimes initially misdiagnosed as meningitis. This disease is rare but has been increasing in recent years. It is treatable with tetracycline derivative drugs (used with caution since some drugs will permanently stain children’s teeth).

- **Babesiosis**: Symptoms are generally mild or go unnoticed and may require no treatment but can be severe in rare cases. Symptoms occur within 1 to 4 weeks and include a gradual onset of malaise, loss of appetite, and fatigue followed within a week or so by fever, drenching sweats, shaking chills, nausea, vomiting, headache, muscle pain, weakness, and depression. This disease is rare particularly in children, however people with impaired immune systems or those who have had their spleen removed are at risk of severe and possibly fatal reactions.

**What can parents do to help prevent tick bites?** Insect repellents can be sprayed on clothing or skin to help prevent tick bites. Be sure that the label says it is affective against ticks and that it contains 30% or less of the chemical DEET since that is the maximum recommended concentration. Permethrin is highly effective against ticks but can only be applied to clothing (see: www.insectshield.com). Light colored clothing helps in locating ticks. Keeping ticks off children and removing them before they bite or transmit a disease are the keys to prevention.

Assist us in tick bite prevention by helping your son or daughter thoroughly check themselves for ticks as soon as they return home. Remove any embedded ticks with tweezers. Launder dirty clothing promptly and dry at high temperatures. Know and watch for symptoms of tick-borne diseases.

Call 401-874-8141 if you have questions or if your child contracts a tick-borne disease and you believe it was from attending a program at Alton Jones (we try to keep track of cases). We welcome your comments.
