

ATL & TLS

Working Together to Make Program-level Assessment (more) Manageable

If you have an upcoming program-level assessment report due
or
you are you planning to respond to results from a past report,

...please consider the following:

Would an easy access
centralized storage and
communication portal
help faculty?

Do you need data
analysis options (such
as using Excel)?

Are you managing
student work from
multiple faculty?
Thinking about using
a common rubric?

Join an exploratory group discussion focused
on **using Brightspace** to support these and
other program-level student learning
assessment efforts.

Following the (virtual) exploratory discussion on September 27, 2023, faculty applications will be available for participation in a funded pilot study using Brightspace for program assessment which includes personalized ITS technical and ATL assessment support.
