

**College of Business**  
**Business Analytics and Artificial Intelligence (BAI) Minor**

*This 18-credit formalized minor is designed to give business and non-business students the opportunity to gain some analytical business career skills to supplement their major.*

**REQUIREMENTS FOR BAI MINOR ARE:**

1. Undergraduate students should declare **Business Analytics and Intelligence** as a minor field of study the semester in which the student expects to complete 75 credit hours. Requirements are satisfied by completion of the 18 credits of related studies offered by the College of Business.
2. A minimum average of 2.0 must be earned in the 18 credits required for the minor.
3. At least 3 courses for the minor must be earned at the University of Rhode Island.
4. **No more than two courses may apply to both the major and minor fields of study.** Courses in general education may be used for the minor. Courses in the minor may not be taken under the Pass/Fail option.
5. **Because business students must be accommodated first, approval of a minor does not guarantee space in BAI111 or BAI210 during the fall or spring semester for nonbusiness majors. Taking one of these courses during the summer or taking a suitable substitute (MTH131 or MTH 141 in place of BAI 111 and STA 308 in place of BAI 210) is strongly recommended as they are required for most of the courses in the minor.**
6. *If you have not completed all 18 required credits, include all courses taken/planned to take along with the respective semester.*
