EFNEP Impacts 2015-2016.

THE EXPANDED FOOD AND NUTRITION EDUCATION PROGRAM AT THE UNIVERSITY OF RHODE ISLAND

Since 1968, EFNEP has brought much needed nutrition education to eligible families and students at schools, churches and community agencies. The goal of EFNEP in Rhode Island is to help Rhode Islanders with limited resources achieve lifelong health and fitness. Our primary target audiences are families with young children and youth in the school system. EFNEP classes reach a wide range of participants and foster true behavior change. We are grateful to the terrific community agencies who partner with us and contribute to our success.

2015-2016 Statewide Impacts:

- 80% of graduates improved how they manage their food dollars in at least one area:
  - 36% planned meals in advance more often
  - 42% compared prices when shopping more often
  - 36% ran out of food before the end of the month less often
  - 36% used a list for grocery shopping more often

- 58% of graduates made improvements in at least one food safety practice:
  - 33% followed recommended practices more often by not allowing meat and dairy foods to sit out more than 2 hours
  - 41% followed recommended practices more often by not thawing foods at room temperature

Praise for EFNEP from graduates:

“I really liked it. It gave me ways to feed my daughter. I am now seeing a nutritionist from my doctor because I am more aware of it. My daughter is more aware too.” - Carla (pictured below with her daughters)

“At first I didn’t like it, but as I kept coming I learned a lot. I thought I could just eat anything. The food was so tasty. So glad we came.” - A father

“I have been trying to lose weight. I especially like the tips about shopping with a list and planning your meals. It’s really helpful.” - Lovelene
77% of graduates had better nutrition practices in at least one area:

- 35% planned meals in advance more often
- 43% prepared foods without adding salt more often
- 38% thought about healthy choices more often when deciding what to feed their family
- 41% used the “Nutrition Facts” on food labels more often to make food choices
- 26% reported that their children ate breakfast more often

**Percentage of EFNEP graduates with improved nutrition based on intake**

- 35% Improved their intake of vegetables
- 32% Improved their intake of whole grains
- 38% Improved their intake of fruit
- 63% Improved their intake in SoFAS (Solid Fats and Added Sugars)

Participants ate 1/3 more cups of fruits and vegetables at exit.

- 2.7c
- 3c

*Improvement indicates positive change towards recommendations for age, gender, and activity level.
