Follow these instructions the first time you run the Travel & Expense Module videos.

**Firefox:**

When you click the videos, you will get this window “Your connection is not secure”. Click “Advanced”

![Image of the security warning window](image)

When you get this window, click “Add Exception . . .”

![Image of the certificate details](image)

When you get this window, click “Confirm Security Exception”

![Image of the security exception confirmation](image)

The video will run.

Once you click through it first time, you don’t have to allow it the next time.
Chrome:

When you click the videos, you will get this window “Your connection is not private”. Click “ADVANCED”

![Your connection is not private](image)

When you get this window, click Proceed to video.oshean.org_(unsafe).

![Your connection is not private](image)

The video will run

Once you click through it first time, you don’t have to allow it the next time.
