The URI Energy Fellows Program is a paid work experience opportunity for undergraduate and graduate students. Students work on projects at URI or with industry partners that address real-world energy challenges. Fellows also receive specialized training in energy topics and leadership.

Who should apply?
Motivated students with an interest and/or passion in sustainability, energy and the environment who are enrolled in any academic major through December 2019 may apply.

When does the program start?
Energy Fellows begin in the Spring 2019 semester (January) and continue through the summer. The fellowship ends in December 2019. In addition to trainings, events and conferences throughout the year, Fellows complete at least 600 paid internship hours with their mentor organization.

Spring 2018 and Fall 2018 semesters – approx. 10 hours / week
Summer 2018 – up to 40 hours / week

Where do students work?
Students are selected to work on a specific energy-related project with a pre-determined mentor. Fellows are also required to participate in professional development and energy-related trainings led by URI Cooperative Extension. Select 2018 placements include: RISE Engineering, Optimal Energy, Energy Source, Rhode Island Office of Energy Resources, National Grid and more!

How do I apply?
Visit uri.edu/coopext/energy-fellows-program to download the application. Submit additional required items to:

URI Cooperative Extension c/o Kaylyn Hawkes Keane
3 East Alumni Avenue, Kingston, RI 02881

Application Deadline:
Tuesday, November 12, 2018
Early Submissions Encouraged!
