

Utility Information Availability Matrix					
Utility	Natural Gas	Water	Oil	Sewer	Storm Water
<b>Sensitivity of Information</b>	High	High	Low	Low	Low
<b>Asset Information</b>	URI owns and operates (3) natural gas master meter stations on the Kingston Campus and associated distribution systems. Buildings served are generally submetered but not all. We currently have approx. 20 submeters Gas mains are a combination of wrapped steel and HDPE plastic. The local campus distribution system operates at 5psi.	The university owns and operates (3)wells that pump from the local aquifer into our distribution system. We operate a million gallon storage tank that provides pressure and volume for domestic use and fire protection. Additional assets include control, monitoring and treatment equipment. All the distribution pipe, valves and hydrants are maintained by our staff and third party contracts.	Fuel Oil Tanks and small comercial boilers are maintained by inhouse staff and thior third party contracts.	URI owns and operates the conveyance system for transporting sewage by gravity to the South Kingstown pump station. Manholes pipes and cleanouts are all maintained by staff and third party contracts.	URI is responsible for the maintenance and operation of the storm water system. This includes maintenance and repair of catch basins, manholes, cleanouts and outfalls.
