Getting Started at The University of Rhode Island

Step 1 -- Register on e-Campus
(You will need your URI Employee ID #. If you haven’t been assigned an ID #, please contact Human Resources.)
- Go to the e-Campus main page at its.uri.edu/ecampus/
- Scroll down and click on New e-Campus User Registration
- Walk through the steps to create your User ID and Password, detailed information is located at uri.makekb.com/entry/58/

Step 2 -- Single Sign On (SSO) Password
URI’s Single Sign On (SSO) is the new main password system that consolidates almost all your application passwords into one. The SSO does not change your e-Campus password. The SSO will give you access to many URI applications once you’ve successfully reset your password. Go to the URI SSO password page at password.uri.edu/
- Click on “reset using current password” under URI Password
- Walk through the steps to create your SSO, detailed information is located at uri.makekb.com/entry/59/

NOTE: Please wait 5-10 minutes before attempting to sign into any of the URI applications to allow the system enough time to consolidate the application's password.

Step 3 -- Activate your email account
After you have set up your SSO password, you will be able to access your URI email through Gmail. Your email address will be in the format of ecampususername@uri.edu.
- Go to the Gmail login page at accounts.google.com/signin
- Enter your URI email address (ecampusUserID@uri.edu)
- Enter your SSO password, then click “Next”
- Walk through the steps to activate your URI email account, detailed information is located at uri.makekb.com/entry/64/

Please visit https://its.uri.edu/ for more information. If you have any questions, please contact the Help Desk at 874-4357 or helpdesk@uri.edu.
