‹ Settings   Personal Hotspot

Personal Hotspot (toggle on)

Now Discoverable.
Other users can look for your shared network using Wi-Fi and Bluetooth under the name "Mulva".

Wi-Fi Password   Bu5t35Br0wn ›

📶 **TO CONNECT USING WI-FI**
1 Choose "Mulva" from the Wi-Fi settings on your computer or other device.
2 Enter the password when prompted.

🔵 **TO CONNECT USING BLUETOOTH**
1 Pair iPhone with your computer.
2 On iPhone, tap Pair or enter the code displayed on your computer.
3 Connect to iPhone from computer.

🔌 **TO CONNECT USING USB**
1 Plug iPhone into your computer.
2 Choose iPhone from the list of network services in your settings.

Cancel   Wi-Fi Password   Done

Password   Bu5t35Br0wn

Other users will join your shared Wi-Fi network using this password.

The password must contain at least 8 characters. Changing the password will disconnect any currently connected users.

1. Select accessibility in settings

2. View accommodations that would be relevant to you!

3. Turn on toggle to turn on the accessibility feature that you selected

4. Your device is now catered to you

❑ Accessibility features include the use of **hearing devices, assistive touch**, **live captions,** and more.

What Is…

Settings 	A hub that stores all features of the iPad that can be adjusted to your needs! You can change your passcode, choose how you would like to receive notifications for call/text messages, and much more. Most common uses for settings: Apple ID, Wifi/hotspot, Bluetooth
Wifi 	A section of settings that allows devices (including your iPad) to connect to the internet. Most apps on the iPad will not be accessible without connecting to Wifi. Tip: Make it a habit to check that your device is connected to Wifi before using it.
Hotspot 	A wireless access point that lets you connect phones, tablets, computers, and other devices to the internet when you're on the go. Note: Some smartphones may not contain hotspots; it's dependent upon your phone plan. In this case, Cyber-Seniors provides a "hotspot box" containing the network and password directly on the face of the box.

Bluetooth	The ability to connect your iPad to an external device such as wireless headphones or a speaker. Once connected your iPad audio will then come through the speaker/headphones. To connect to bluetooth: Enter settings and click on the bluetooth section, located near the top. Turn bluetooth on along with the device you are attempting to connect. That device should appear under devices. Select the device. Once it's connected, "connected" will appear alongside the speaker/wireless headphones.
