New procedure to synch TP 8 with Sakai – effective 12/10/17

Why this change?
There was a problem that affected only some faculty, some of the time, not allowing them to synch their TurningPoint 8 student information with the Sakai course.

In the TurningPoint 8 app on your desktop computer, when you are ready to update the course or upload grades – go to the Manage tab as usual.

Here are the differences – with screenshots:
- Choose Sakai SSO from the dropdown menu where you used to choose Sakai.

- A Sakai login screen will appear. Login with your eCampus user ID and Sakai password. (We used to need to enter the 9 digit EMPL ID for this authentication and it looked different).

- When you get the next screen, click Finalize Connection in the bottom right corner.
New procedure to synch TP 8 with Sakai – effective 12/10/17

- Then the next screen in the process will appear depending on what you are doing.

If you experience any difficulty with this procedure, please help us to offer you the best support experience by contacting the IT Service Desk to open a ticket. If the Help Desk cannot solve your issue right away, the ticket will be automatically expedited to the appropriate support group and responded to by the first available person. IT Service Desk 874-HELP (4357); helpdesk@uri.edu.
