Thanks for a great October! You all have kept us so busy with new challenges and amazing attendance to our workshops. We are thrilled to see so many new faces this semester!

**Midterm VR Party**
For the first time, MakerspaceURI decided to celebrate midterms by throwing a VR Party all week long. This gave students a chance to take a break from studying, get moving, play games and have fun. We saw many first time users and several old partons as well. Though all URI students, staff, and faculty are welcome to come in anytime to try our various resources, we will be running another VR Party during finals. Please be sure to join us again December 12-20th, as we celebrate the last week of the semester, before we break for the holidays.

**3D Scanning Cardboard**
Students from ART103: Three-Dimensional Studio partnered with MakespaceURI at the University Libraries to create a 3D printed version of a repeating motif using 3d scanning and printing. Each student incorporated printed PLA tiles, that were scanned from their hand-carved cardboard tiles, to create a wholly engaged design. Not only did this project emphasize the use of light and shadow, but students learned how to incorporate hand-working skills with digital technology.

**Highlighted November Events**
Join MakerspaceURI with Nunnery Orthotic & Prosthetic Technologies on Wednesday, November 20th from 12-1pm. This workshop will focus on 3D scanning the human body for the development of functioning prosthetics. Michael Nunnery, and his assistant, will walk us through the digital workflow they use for building prosthetics. This workshop will entail a hands-on demonstration of the EinScan Pro in MakerspaceURI and the aid of 3D printed samples. Limited Availability.
Please sign-up by filling out the form [Here](#).

**MakerspaceURI Mailing List**
If you would like to stay up-to-date with the latest MakerspaceURI news, workshops and opportunities, please join our mailing list by filling out the form [Here](#).

**Upcoming Events**

- **Fridays during the Fall Semester - Sticker Fridays** *(stop by anytime between 12-3pm)*
  Join us any Friday during the fall semester and learn how to use the Cameo Silhouette to make vinyl stickers

- **Wednesday November 13, 2019 - Rock Kindness Workshop**
  Learn how to use the laser cutter to engrave a kind message on a rock to be hidden on campus for someone else to find

- **Friday November 15, 2019 - Upcycling Workshop** *(stop by anytime between 3-5pm)*
  Learn how to use the sewing and digital embroidery machines to upcycle a well-loved article of clothing into something new

- **Wednesday November 20, 2019 - 3D Scanning the Human Body** *(12-1pm)*
  Learn how to use the Einscan 3D scanner in this hands-on workshop. Limited availability: Please contact eauzmann@uri.edu

- **Tuesday November 26, 2019 - S-Laser Bells** *(stop by anytime between 12-2pm)*
  Learn how to use laser engraving programs like Corel and Adobe Illustrator to create custom holiday gifts on the laser cutter
