At this time, MakerspaceURI is still closed to the public, but as Personal Protective Equipment (PPE) needs wind down across the state, we wanted to highlight some of the services we are currently offering to the URI community.

**See-Through Face Masks**
MakerpaceURI has sewn about 325 traditional, washable face masks and has recently started offering small runs of see-through face masks to the URI community. These unique masks are beneficial to those who are hard of hearing and/or rely on lip reading and facial expressions to communicate. If you are in need of some within your department, lab or classroom, please reach out to MakespaceURI.

**Now Offering Digital Fabrication Services**
MakerspaceURI is offering limited digital fabrication services, which will be made available for pickup. If you are a student, faculty or staff member who is working on research activities that could benefit from 3D scanning/printer, laser cutting, vinyl cutting and more, please reach out to our Manager, Erika Uzmann at eauzmann@uri.edu to set up a consultation.

**LinkedIn Learning**
We would also like to take the opportunity to remind everyone that University Libraries holds ten LinkedIn Learning licenses (formerly Lynda.com) available for use by students, staff and faculty. LinkedIn Learning offers video courses taught by industry experts in software, creative, and business skills. If you want to develop a new skill, please fill out the form Here.

**MakerspaceURI Mailing List**
If you would like to stay up-to-date with the latest MakerspaceURI news, workshops and events, please join our mailing list by filling out the form Here.
