This College of Nursing PhD Student Handbook is provided as a guide for students enrolled in the Doctor of Philosophy (PhD) nursing program at URI, and is intended to provide PhD nursing students with:

(1) an overview of the College of Nursing and its history, vision, mission, values;
(2) a description of the competencies or expected outcomes that PhD students are expected to achieve prior to graduation; and
(3) a description of the College’s academic and professional policies applicable to PhD students in the College of Nursing.

This Handbook is intended as a convenient guide to the current policies and procedures within the College of Nursing that are relevant for PhD students. CON graduate policies and procedures are consistent with those outlined in the University Manual, the Graduate School Manual and the University Graduate Catalog. In some cases, procedures and policies may be more specific or rigorous within the CON than the minimum requirements set forth in the Graduate School Manual.

All students are expected to review the CON PhD Student Handbook at the start of the academic year and as necessary throughout the academic year. Each student assumes responsibility to become familiar with the information contained in this Handbook. Students are expected to comply with all policies and curricular requirements that were in place at the time they matriculated into the College of Nursing, although students have the option to follow updated policies, curricula, etc. Procedures change periodically; all students must follow the current procedures being followed in any academic year. The CON Handbook may be accessed electronically on the College of Nursing website. This location contains the most up-to-date version of the Handbook and supersedes all other versions. Any questions pertaining to any of the contents of this Handbook should be directed to Dr. Kathy Hutchinson, CON Associate Dean for Graduate Programs & Research.

The College of Nursing reserves the right to add, delete, revise, or change the information, including policies and procedures set forth in this Handbook.
History of the College of Nursing

In September 1945, the University began its first nursing program with nine students in the School of Home Economics. In 1947, the Division of Nursing was established and Miss Louisa White, Associate Professor, was appointed Director. The College began offering a Master’s Degree in Nursing in 1970, a Doctor of Philosophy (PhD) in 1985, and a Doctor in Nurse Practice (DNP) in 2010. Until 1968, nursing students lived in Providence during the clinical portion of the program most of the faculty had offices at Rhode Island Hospital. In 1963, on the Kingston campus, Fogarty Hall was dedicated and office space was provided for the Dean, several faculty and two secretaries. Finally, a new building, White Hall, was designed specifically for the College of Nursing. White Hall, named in honor of the first director of the nursing program, was dedicated in 1977. In 2017, URI CON expanded to an additional location in Providence – the Rhode Island Nursing Education Center (RINEC). RINEC is home to the CON graduate programs and upper division undergraduate courses.

Accreditation

The baccalaureate degree in nursing, master’s degree in nursing, Doctor of Nursing Practice and clinical post-master’s certificate programs at The University of Rhode Island College of Nursing are accredited by the Commission on Collegiate Nursing Education (CCNE) of the American Association of Colleges of Nursing (AACN) (http://www.aacn.nche.edu/ccne-accreditation). PhD programs are not accredited by AACN/CCNE; however, the PhD program follows the AACN recommendations for research focused doctoral programs in nursing (AACN, 2001; AACN, 2010). (Available at: https://www.aacnnursing.org/News-Information/Research-Data-Center/PhD)

URI College of Nursing Vision

The University of Rhode Island College of Nursing is a dynamic catalyst for improving health and transforming healthcare through innovation and excellence in education, knowledge development, discovery and professional practice to meet the needs of a global society.

URI College of Nursing Mission

To prepare nurses to excel as outstanding and compassionate clinicians, scholars and leaders who will enhance the health and health care of individuals, families, communities and populations, both locally and globally.

URI College of Nursing Values

• Social justice, diversity, inclusivity, & civic engagement
• Respectful, ethical, humanistic, & compassionate care
• Intellectual curiosity, innovation, & scholarly inquiry
• Leadership, lifelong learning, & excellence in practice
III. PhD Program Outcomes

PhD Program Outcomes include the following:

1. **Knowledge and Inquiry**: Expand the scientific knowledge base within and beyond the discipline through generation and dissemination of relevant theoretical knowledge and independent and/or collaborative research.

2. **Nursing Practice**: Produce knowledge that has relevance for nursing and health care.

3. **Professionalism**: Develop knowledge while upholding ethical and social responsibility.

4. **Communication and Collaboration**: Disseminate knowledge generated from individual and/or team science.

5. **Societal and Global Influences**: Provide leadership in generating and disseminating nursing knowledge to guide research and/or policy related to societal and global health and health care.

6. **Leadership**: Assume leadership in conducting and disseminating high impact, translational and innovative research and scholarship that addresses health and health care challenges.

Students demonstrate competency in these outcomes by meeting course objectives outlined in each course syllabus, passing a comprehensive examination and finally, completing and defending a dissertation research project. Dissertations are expected to be scientifically sound, methodologically rigorous and publishable.
IV. Curriculum

The PhD program includes three main components: coursework, the comprehensive examination, and the dissertation. The PhD degree requires completion of a minimum of 53 credits beyond the Master’s Degree. The 53 credits include: core courses, advanced nursing courses, elective courses and 18 credits of dissertation research.

The purpose of the core and advanced nursing coursework is to provide the basic knowledge and skills for generating new knowledge in nursing. It includes 23 credits of coursework in nursing science, research methods (qualitative and quantitative), theory development (inductive and deductive approaches), and role development in nursing research. Additional coursework includes a minimum of 3 credits in advanced statistics, 6 credits of methods and/or statistics electives, and 3 credits of electives and/or cognate courses.

All PhD students are encouraged to complete a 0 credit mentored research experience during their PhD program. The program culminates with written and oral comprehensive exams and the completion of 18 credits of dissertation research. Students have a maximum of seven (7) years to complete the PhD degree requirements including the dissertation.

Old PhD Curriculum (Pre-2020) (Minimum of 53 credits)
NUR 660 - Philosophical & Theoretical Bases of Nursing Science (4 crs)
NUR 602 - Construction of Nursing Theory I: Inductive Process (4 crs)
NUR 603 - Construction of Nursing Theory II: Deductive Process (3 crs)
NUR 611 - Theories & Research in the Nursing Domains (3 crs)
NUR 671 - Role Development in Nursing Research (3 crs)
NUR 651 - Advanced Methods in Nursing Research I (Qualitative Methods) (3 crs)
NUR 652 - Advanced Methods in Nursing Research II (Quantitative Methods) (3 crs)
Advanced Statistics (3 crs)
Methods / Statistics Electives (6 crs)
Free Elective/Independent Study/Other (3 crs)
NUR 699 - Dissertation Research (18 crs)
New PhD Curriculum (2020 and thereafter) (Minimum of 53 credits)
NUR 600 - Philosophical Foundations of Healthcare Research (3 crs)
NUR 602 - Construction of Nursing Theory I: Inductive Process (4 crs)
NUR 603 - Construction of Nursing Theory II: Deductive Process (3 crs)

NUR 649 – Responsible Conduct of Nursing and Healthcare Research (1 cr)
NUR 650 – Research Roles and Methods in Nursing (3 cr)
NUR 651 - Advanced Methods in Nursing Research I (Qualitative Methods) (3 crs)
NUR 652 - Advanced Methods in Nursing Research II (Quantitative Methods) (3 crs)

Advanced Statistics (6 crs)
Cognates & Electives (9 crs)

NUR 699 - Dissertation Research (18 crs)

Full-time or Part-time PhD Study
PhD students are encouraged to pursue the PhD degree on a full-time basis whenever possible, in order to allow for full engagement in coursework, scholarship, participation in brown bag colloquia, formal and informal research training and as a member of the scholarly community. A full-time program of study may outline a plan for completing required coursework within two years, two years plus some summer work or three years. “Full-time” is defined by the Graduate School as being registered for 6 or more credits per semester while enrolled in coursework. Full-time PhD students who wish to complete coursework in two years should limit outside work commitments to summers, semester breaks and weekends. An example of a two-year full-time program of study is provided on the next page. Examples of three-year full-time programs of study and part-time programs of study are available from the CON Graduate Program Office.

Funding
Full-time PhD students are eligible for teaching assistantships, research assistantships, and university fellowships. Assistantships include tuition, a stipend and health insurance in exchange for either 10 or 20 hours per week of work. Most assistantships are teaching assistantships. Research assistantships may be available through faculty research grants. Fellowships are competitive and awarded by the Graduate School based upon nominations by the Associate Deans of the URI Graduate Programs. Students are also encouraged to apply for Pre-doctoral Ruth L. Kirschstein NRSA fellowship awards (See: https://grants.nih.gov/grants/guide/pa-files/PA-19-195.html [reissue of PA-18-
These prestigious awards provide stipends and tuition. In order to be eligible, students must have completed training in the responsible conduct of research that meets NIH requirements (see NOT-OD-16-122). Completion of NUR 649 and CITI training fulfills this requirement.

In addition to the above sources of funding, one or two outstanding PhD students per year will be nominated to receive supplemental funding as a **Sculco Graduate Nursing Research Scholar (GNRS)**. Each GNRS receives additional funding of approximately $48,000 over 3 years, in tandem with the assistantship (above), GNRS awards provide summer funding and research training and enhancement funds to advance nursing research and scholarship. GNRS awards are made possible by a generous donation from URI CON alumna, Dr. Cynthia Sculco, and her husband, Dr. Thomas Sculco.

**Filing an Individual PhD Student Program of Study**

All URI graduate students are required to submit a signed program of study to the Graduate School during or before the third semester of doctoral study. The College of Nursing requires all graduate students to file a program of study with the CON Graduate Program Office during the their advisor and approved by the CON Associate Dean for Graduate Programs & Research before being submitting to the Graduate School for final approval. The program of study must include plans to complete all required courses in the curriculum and should include courses that the student plans to take to meet other curricular requirements and electives. The statistics requirements specified in the student’s curriculum must be met via advanced formal coursework, not independent studies. Advanced coursework in qualitative or quantitative methods and additional statistics courses may also be taken as electives. NUR 683 Secondary Analysis of Health-Related Data and NUR 681 Implementation Science, are two examples offered in the CON. A list of graduate statistics and methods courses across URI is available on the CON Graduate Student Brightspace site.

**Independent Studies**

Independent studies may be used to fill remaining elective requirements, to undertake in-depth study of a topic, and/or as opportunities for experiential research training or participation in scholarly projects (e.g., presentations or journal articles). However, independent studies are not substitutes for methods or statistics courses. PhD students who wish to undertake an independent study should register for NUR 506 and complete a 1 – 2 page syllabus for the course with the faculty member who will supervise the independent study. The syllabus should simply outline the objectives for the independent study, grading plan (grade or S/U) and grading criteria. A syllabus template for independent studies is available on the CON Graduate Student Brightspace site.

Comprehensive Examination
The College of Nursing process is consistent with the Graduate School Manual (GSM) guidelines for the Comprehensive Examination. Please refer to GSM Section 7.57. The Comprehensive Examination is taken after required coursework is completed (within one year after course completion). The CON is in the process of streamlining the comprehensive examination procedures to ensure consistency, quality and efficiency in the process. These new procedures will take effect in 2021.

Doctoral Dissertation – Requirements & Deadlines
The Graduate School Manual (GSM) Sections 11.10 – 11.29 outlines the requirements for doctoral dissertations that will be submitted in partial fulfillment of the graduate degree requirements for the PhD degree. These requirements are outlined below. Specific dissertation requirements are listed in the Graduate School document titled, “Thesis/Dissertation: From Proposal to Defense,” that can be found at https://web.uri.edu/graduate-school/academics/thesis-dissertation/. A copy of this document is also provided on the CON Graduate Student Brightspace site.

Students are responsible for consulting with the CON Graduate Program Office and the URI Graduate School regarding University requirements and deadlines related to the submission, defense, and approval of theses and dissertations (see the Graduate School Deadline Calendar for listing of pertinent deadlines).**

**CON PhD students should note that some of the Graduate School and URI deadlines are final dates for all URI PhD students and may not be feasible or workable for students in nursing or social sciences (e.g., the final dissertation IRB approval deadline [August] for those anticipating May graduation and the final dissertation proposal approval deadline [October] for those anticipating May graduation. These dates may work for oceanography or lab science PhD students who will be working with existing data, but they will probably not work for students in the CON who plan to undertake dissertation research that includes primary data collection. CON students must have an approved dissertation proposal before they can obtain IRB approval. Proposal approval, IRB approval, data collection and data analysis often take far longer than students anticipate. The timeline should include realistic estimates of how long participant recruitment and data collection will take. If data collection can be completed in a few months, then students should plan to have proposal approval at least 10 – 12 months before the dissertation submission deadline for the desired date of graduation (e.g., June 2021 at the latest for those who wish to graduate in May 2022), with IRB approval obtained in June or July of 2021 at the latest.

The steps in the dissertation process are outlined below.
Doctoral Dissertation Process – 8 Steps

Dissertation Process Step 1 – Select a Major Professor and Form a Doctoral Committee

The major professor is the PhD student’s primary mentor and chair of the dissertation or doctoral committee. The major professor may or may not be the faculty advisor who was appointed to the student at the time of admission. The major professor should be an experienced scholar and knowledgeable researcher with the expertise necessary to mentor and support the PhD student as a beginning researcher. The major professor should have adequate time to devote to mentoring the PhD student and ideally is mentoring no more than 2 other PhD students in various stages in the PhD program. The major professor should be selected during the first 2 years of coursework, prior to the comprehensive examination. After being selected, the major professor may take over as the faculty advisor. The CON graduate program office must be notified.

The doctoral committee must include a minimum of 3 members, one of whom must be from outside of the URI College of Nursing. Outside members may be recruited from other colleges within URI or from outside of the university. Students are encouraged to discuss options with faculty, their major professor, and/or the CON Associate Dean for Graduate Programs & Research. They may also consider and seek referrals to outside experts at other universities. Ideally all members of the doctoral committee are experts who can significantly contribute to the student’s project in either the substantive area, the theory or the method the student is considering/planning. The CON graduate program office and the Graduate School must be notified of the doctoral committee formation and membership.

Dissertation Process Step 2 - Complete Requirements for Training in the Responsible Conduct of Research

All PhD students must meet the university and CON requirements for training in the ethical and responsible conduct of research prior to conducting dissertation research. This requirement is met by completing 3 components: (1) completing CITI training; (2) completing the 1 credit course (NUR 649) Responsible Conduct of Research in Nursing & Health (required for students admitted in 2020 and later) and (3) obtaining approval for the dissertation study from the URI IRB. Part 3 of this requirement is completed after the dissertation proposal is approved by the student’s committee and prior to submitting the approved proposal to the Graduate School.

Dissertation Process Step 3 – Prepare and Defend the Dissertation Proposal

The completion of a dissertation is a major requirement for the PhD degree. It is an independent research study and scholarly work that addresses a significant issue of relevance to
nursing, utilizes rigorous research methods, is well written and makes a meaningful contribution to the existing literature. The dissertation proposal at URI follows a very specific format. Although students may develop a more lengthy proposal for submission to their committee and proposal defense, the dissertation proposal that is submitted to the URI Graduate School is limited to 15 or fewer double-spaced pages and must adhere to requirements for font size, length of title, and formatting. The specific requirements for the dissertation proposal are listed in the Graduate School document titled, “Thesis/Dissertation: From Proposal to Defense,” that can be found at https://web.uri.edu/graduate-school/academics/thesis-dissertation/. A copy of this document is also provided on the CON Graduate Student Brightspace site.

**Dissertation Process Step 4 – Obtain IRB Approval for the Dissertation Research**

After the dissertation proposal is approved by the student’s committee, they must obtain approval for the dissertation study from the URI IRB. This requirement is completed after the dissertation proposal is approved by the student’s committee and prior to submitting the approved proposal to the Graduate School.

**Dissertation Process Step 5 – Conduct the Dissertation Research and Analyze the Data**

No dissertation data collection may occur until after: (1) the dissertation proposal has been approved by the doctoral committee, the CON Associate Dean for Graduate Programs & Research and the Graduate School and (2) IRB approval has been granted. The dissertation research is conducted in keeping with the dissertation proposal that was approved by the student’s doctoral committee. Any substantive changes to the research plan in the approved dissertation proposal, including site, sample, instruments, or procedures, must be approved by the committee and the IRB. Data should be analyzed using rigorous means of analysis that are appropriate to the type and level of data and the method being used.

**Dissertation Process Step 6 – Write up the Results and the Dissertation**

The final dissertation is developed and written under the direct supervision of the major professor and often with input from other committee members. The process for development and review shall be at the discretion of the major professor in concert with the other committee members and the student. The dissertation should be written in accordance with APA format 7th edition (APA, 2019). Grammar, syntax, writing style, etc. should be scholarly and consistent with doctoral standards. Students should allow plenty of time to write the dissertation. It is to be expected that candidates will submit multiple drafts and complete numerous revisions while writing the dissertation.

Dissertations written in the standard format often include the dissertation proposal elements (Introduction, Review of the Literature and Methods) as Chapters 1, 2 and 3 in the final dissertation.
Chapter 4 is often used for Results and Chapter 5 for Discussion (please see Dissertation Formats). All text, tables, levels of headings and references should be formatted according to the APA manual 7th edition (APA, 2019). Templates for dissertation title pages, signature pages, etc. are provided in the Graduate School document titled, “Thesis/Dissertation: From Proposal to Defense,” that can be found at https://web.uri.edu/graduate-school/academics/thesis-dissertation/. A copy of this document is also provided on the CON Graduate Student Brightspace site.

The specific requirements for the dissertation are listed in the Graduate School document titled, “Thesis/Dissertation: From Proposal to Defense,” that can be found at https://web.uri.edu/graduate-school/academics/thesis-dissertation/. A copy of this document is also provided on the CON Graduate Student Brightspace site. Please re

An oral examination or defense of the dissertation is required in all PhD programs. In addition to the student’s program committee, the defense committee will include members of the graduate faculty outside of their program committee who are competent and willing to be nominated as the additional member(s) of their defense committee. For the PhD defense committee, one member of the graduate faculty is needed from a department other than the one in which the student is enrolled. The student should inform the additional faculty member that his/her name is being submitted in nomination to the Dean of the Graduate School who is not restricted in the choice to the name submitted.

Scheduling a Dissertation Defense. Once the full defense committee has been chosen, the next step is to secure approval to proceed with the defense. The major professor must first sign the defense request form to signify that the dissertation is in a form acceptable for defense and that it is, in fact, defendable. The requirement that the document be acceptable and defendable means that it:

1) is complete and contains all text, data, tables, charts, maps, photographs, appendices, full references, citations, and/or bibliographies as required by accepted standards of academic integrity;
2) represents a finished scholarly product of the student’s research in the format required for binding; and
3) is free of obvious fatal flaws.

When the major professor has thoroughly reviewed the final draft and determined that it is defendable, the student will present the major professor with the Request for Oral Examination in Defense of Thesis/Dissertation form for their signature. This form will include a proposed date, time, and location of the defense. The form signed by the major professor is then circulated to the remaining members of the program committee and the additional member(s) of the defense
committee. Their signatures signify that they agree to participate in the defense at the time, date, and location specified on the defense request form. When a fully signed Request for Oral Examination in Defense of Thesis/Dissertation form is in hand, it can then be submitted to the Graduate School, with a copy to the CON Graduate Program Office. The CON Graduate Program Office will send out and post announcements of the upcoming defense to CON faculty and graduate students.

Note: Dissertation defenses are open and faculty and PhD students are invited to attend. Dissertation defenses will not be scheduled during periods when the University is in recess. Students must be registered for any semester or summer term in which they take an examination or defend a dissertation. All dissertation defenses shall be open to all faculty and students of this University. Defenses may only be closed under exceptional circumstances. Defenses may only be held in the summer months under exceptional circumstances and with permission of the CON Graduate Program Office.

At least 20 calendar days before the date on which the defense is proposed to be held, the student shall submit to the Graduate School enough unbound copies of the dissertation for members of the oral defense committee in a form acceptable for examination purposes. A minimum of one paper copy must be submitted for the chair of the defense committee, along with additional copies for those committee members who have requested a paper copy. Paper copies are not required for members of the defense committee who have indicated that they only require an electronic version of the defense copy. The Request to Schedule an Oral Defense of a Master’s Thesis/Doctoral Dissertation signed by every member of the defense committee must also be submitted to the Graduate School at this time, with a copy to the CON Graduate Program Office. Copies of the thesis/dissertation submitted for defense may contain a reasonable number of clearly legible corrections (printed rather than handwritten), may be printed on paper of lesser quality than that required for the final copies, and may contain pages with only one or two paragraphs. Each copy of the dissertation must have a copy of the title page attached to it. In the final copies, type size, paper quality, margins and typed pagination must all conform to Graduate School standards (see Graduate School web document titled ‘Thesis/Dissertation: From Proposal to Defense’ that can be found at https://web.uri.edu/graduate-school/files/ThesisDissertationProcess.pdf).

Upon receipt of the copy or copies of the thesis/dissertation, and the request for the oral defense, the Dean of the Graduate School will be responsible for reviewing the student’s entire record to ascertain that they have completed all other degree requirements, and that all copies of the thesis/dissertation are in a form acceptable for examination. If the review is satisfactory, the oral examination in defense of the dissertation will be scheduled.
Not fewer than 15 calendar days prior to the date set for their oral defense, students shall distribute copies of the dissertation to the members of their oral defense committee who have requested a paper copy. Each copy will bear the official notice of the time and place of the oral defense. Members of the defense committee who have requested one or more electronic versions of the defense copy must also have those electronic copies delivered no fewer than 15 calendar days prior to the date of the oral defense. The chair of the oral defense committee will also be supplied with a copy of the student’s dissertation proposal. The members of the oral defense committee shall examine the dissertation for evidence of sound scholarship and shall bring to the oral defense written suggestions for changes or corrections in the manuscript.

It is usually the responsibility of the chair of the oral examining committee to conduct the examination and to provide for changes and corrections to be made in a successfully defended dissertation before it is given committee approval. A unanimous vote of approval is required for a student to pass the defense. All members of the oral examining committee also sign the form provided for certifying the student’s successful defense of the dissertation. When a student’s performance is unsatisfactory, one re-examination may be recommended and the conditions under which it is to be given will be stated by the committee.

Approval of the dissertation will be certified by the signatures of the major professor and the remainder of the dissertation committee on the formal dissertation signature page. Original, handwritten signatures are required. These signatures confirm that any changes and corrections to the dissertation have been made. Only the members of the dissertation committee, not the additional members of the defense committee, sign the formal signature page of the dissertation.

**Dissertation Process Step 8 – Make and Corrections / Edits and Submit Final Version**

If a student passes the oral examination in defense of the dissertation but is required to make changes or edits to the dissertation, then the major professor or defense chair must obtain the signatures of the appropriate committee members on the form titled “Certification that Mandatory Corrections were Made to a Successfully Defended Thesis/Dissertation.” The form can be found at [https://web.uri.edu/graduate-school/files/certification_mandatory_corrections_dissertation.pdf](https://web.uri.edu/graduate-school/files/certification_mandatory_corrections_dissertation.pdf) for doctoral dissertations. This form serves to verify that the required changes were made and that the revised thesis/dissertation meets the approval of the appropriate faculty members. The completed form is then submitted to the Graduate School. Final approval of all theses/dissertations rests with the Dean / Interim Dean of the Graduate School.
**Doctoral Dissertation Formats**

When preparing the dissertation, students are expected to consult with the major professor and members of the dissertation committee. The student’s major professor will be the principal supervisor of the dissertation and will decide, in consultation with the student, which structure will be used. URI allows for two different formats / structures for preparation of dissertations: the **Standard Format** and the **Manuscript Format**. Regardless of the format used, all dissertations (as well as all course papers, reports, etc.) must be prepared in accordance with the accepted standards of academic integrity, including proper citation and attribution of all material that is not the original product of the writer.

**Standard Format**. The Standard Format consists of one of several formats for which electronic templates have been prepared. Theses templates are available in the Graduate School web document titled 'Thesis/Dissertation: From Proposal to Defense' that can be found at https://web.uri.edu/graduate-school/academics/thisis-dissertation/. Each of these templates contains the same universal formatting rules referred to in Section 11.14 of the Graduate School Manual. All dissertations, regardless of format, must adhere to University guidelines regarding features such as pagination and margin size. These guidelines may be found in the Graduate School document titled 'Thesis/Dissertation: From Proposal to Defense’ that can be found at https://web.uri.edu/graduate-school/academics/Thesis-Dissertation/.

The style and formatting for all aspects of the dissertation should adhere to APA manual 7th edition (2019) and the Graduate School guidelines. The methods and results sections of the final dissertation are usually written in the past tense in the final dissertation because the study has been completed. (e.g., the final study sample included. . .; the participants were. . .). A generic outline is provided below, although the content outline will be modified for dissertations that employ qualitative approaches or mixed methods and as deemed appropriate by the major professor and/or committee members.

A sample outline is provided below for the standard dissertation format. Headings, subheadings and organization will vary for dissertations that employ qualitative approaches or mixed methods and/or as deemed appropriate by the major professor / dissertation committee chairperson. The methods and results sections of the final dissertation are usually written in the past tense because the study has been completed. (e.g., the study participants were. . .).
ABSTRACT

CHAPTER ONE: STATEMENT OF THE PROBLEM
   Statement of Problem
   Significance of Problem
   Purpose of the Study
   Definitions and Assumptions Based on Existing Knowledge,
   Aims, Research Questions and/or Hypotheses

CHAPTER TWO: REVIEW OF THE LITERATURE
   Theoretical basis (unless qualitative methods requiring inductive theory development after data analysis are proposed)
   Background / Synthesized Review of Literature
   Relevant Findings from Preliminary Studies
   Other information deemed relevant by the committee

CHAPTER THREE: DESIGN & METHODS
   Study design / Methodology
   Study Site
   Sampling
   Procedures
   Measures / Instruments
   Data Analysis

CHAPTER FOUR: RESULTS

CHAPTER FIVE: DISCUSSION

APPENDICES

   Instruments / Consent forms / Letters of support or approvals from agencies and/or IRBs.
**Manuscript Format.** In April, 2020, the CON PhD Committee approved the following guidelines related to the use of the manuscript format option for dissertations in the College of Nursing. Students electing the manuscript option must follow the guidelines from the Graduate School (https://web.uri.edu/graduate-school/academics/thesis-dissertation) and the following CON guidelines. In the CON, students are expected to work closely with their major professor and their doctoral committee.

The dissertation must consist of at least six chapters, of which three will be manuscripts: at a minimum, two must be submitted to a peer reviewed journal and one may be in manuscript form. All journal selections and submissions must be approved by the doctoral committee. The student must be the first author on all manuscripts. At least one manuscript must report findings from a data-based research study conducted by the student. The first manuscript (e.g. literature review, concept analysis, preliminary work, or pilot study) may be submitted or published prior to formation of the doctoral committee with the approval of the major professor and subsequent approval from the doctoral committee, providing that the content is relevant to the dissertation research. All dissertation manuscripts must be approved by the doctoral committee. An introductory chapter containing an overview of the problem and significance, a methodological chapter, and a final chapter including discussion, limitations, conclusions, and implications are required. Substantive review of the literature must be provided either in one of the manuscripts, as an additional chapter, or in the introductory chapter. Evidence of theoretical thinking and a theoretical framework, where appropriate for guiding research and understanding results, must be included. Some examples for organizing the chapters in a dissertation using the manuscript option include:

**Example A:**
1. Introductory chapter
2. PUB#1: literature review/concept analysis
3. Methods chapter
4. PUB#2: methods paper
5. PUB#3: data based study
6. Final chapter

**Example B:**
1. Introductory chapter
2. PUB#1: literature review/concept analysis
3. Methods chapter
4. PUB#2: data based study
5. PUB#3: data based study
6. Final chapter
Example C:
1. Introductory chapter
2. Literature review
3. Methods chapter
4. PUB#1: data based study
5. PUB#2: data based study
6. PUB#3: data based study
7. Final chapter

Example D:
1. Introductory chapter (including literature review)
2. Methods chapter
3. PUB#1: data based study
4. PUB#2: data based study
5. PUB#3: data based study
6. Final chapter
V. Academic Policies

All academic policies in the College of Nursing Graduate Program are consistent with those of the URI Graduate School. In some instances, the College has policies that are more stringent than the minimum requirements put forth by the Graduate School.

Time Limit
The policy of the Graduate School and the College of Nursing is that PhD students have seven (7) years to complete all requirements for the PhD degree. The time limit is the same whether students undertake full-time or part-time study. Students should plan their program of study to allow plenty of time to complete the dissertation; research projects often take longer than originally anticipated.

Formatting for Papers and Dissertations
The College of Nursing uses APA format for all formal course papers, written comprehensive examinations and dissertations. Please refer to: APA (2019). *Publication Manual of the American Psychological Association,* (7th ed.). APA.

Grades & Grading
Consistent with the University, the following grading system is used for graduate courses in the College of Nursing (CON):

A    93-100%
A-   90-92%
B+   87-89%
B    83-86%
B-   80-82%
C+   77-79%
C    73-76%
C-   70-72%
D+   67-69%
D    60-66%
F    below 60%
Although the Graduate School does allow for credit to be awarded for graduate courses with grades of C or C+, students with grades of less than a B- may undergo academic review within the College of Nursing. Students will also undergo academic review if they do not maintain a cumulative GPA of B (3.00) or better. Academic review within the College of Nursing will determine whether the student will: (a) continue in the program without special conditions; (b) repeat the course; (c) continue on provisional status; or (d) be dismissed. If a student receives a grade of D, F, or U in a course, or does not maintain a cumulative average of B (3.00) or better, her/his status as a graduate student will also be reviewed by the Dean of the Graduate School in consultation the CON Associate Dean and graduate faculty. Such review may result in being placed on provisional status, being suspended, or being dismissed. (See Graduate School Manual (GSM), Appendix A; See Section A.26.1 for Graduate Student Academic Appeals procedures.)

**Grade of “Incomplete”**. According to the University Manual and Graduate School Manual, a graduate student will receive a grade of “incomplete’ in any course in which the coursework has been passing up until the time of a documented precipitating incident or condition, but has not been completed because of illness or another reason which in the opinion of the instructor justifies the report.” “Incomplete” grades must be resolved and a grade change submitted within one year. An ‘incomplete’ not removed within one calendar year shall remain on the student’s permanent record, except that the instructor with the approval of the CON Associate Dean for Graduate Programs & Research may extend the time limit. In the instructor’s absence, the Associate Dean with the approval of the Dean of the Graduate School, may extend the time limit by which the incomplete work must be finished. (See UM 8.53.20, GSM 10.42.) Extensions are only granted under unusual and compelling circumstances and only when the student is passing the course at the time the incomplete is requested.

“The instructor shall accompany a report of ‘incomplete’ with a written explanation and file a copy of the explanation with the CON Associate Dean. The student receiving an ‘incomplete’ shall make satisfactory arrangements with the instructor to remove the deficiency and the new grade shall be immediately reported to Enrollment Services and the department Chair.” (See UM 8.53.21) Because the CON does not have department chairs, the Associate Deans act in this capacity.

**Grade Appeal Procedures**  
In the event that a student thinks that a grade they received in a particular course is incorrect, the student has the right to appeal the grade in the following procedure. [Note: The student must commence the appeal process within 5 calendar days of the posting of the grade, and if the appeal is taken to steps 2, 3 or 4, the student must commence each next step within two calendar days after the conclusion of the prior step]:

---

22
1. The student shall first discuss the grade with the instructor.
2. If unresolved, the student shall discuss concerns with the Associate Dean for Graduate Programs & Research, who will discuss the matter with the Instructor.
3. If still unresolved, the student may submit a written appeal to the Associate Dean. If the Associate Dean believes the grade should be changed, and the instructor does not agree to the change, the Associate Dean shall issue a written decision to the student and the instructor which includes his/her recommended grade change, and his/her reasons for recommending the change. If the Associate Dean does not believe the grade should be changed, he/she shall issue a written decision to the student and Instructor stating his/her conclusions and reasons.
4. If still unresolved, the student may make a second written appeal to a College of Nursing Graduate Scholastic Standing Committee by notifying the Associate Dean of the further appeal. The Associate Dean will convene an ad hoc Graduate Scholastic Standing Committee comprised of 3 to 5 PhD-prepared faculty with graduate status. The Committee will provide the Instructor the opportunity to respond to the appeal, following which, unless the Instructor voluntarily agrees to make a grade change acceptable to the student, the Committee will issue a final decision on the matter, stating its conclusions and reasons. If the Committee decides that the grade should be changed over the objection of the Instructor, the grade shall be changed in the manner specified in the University Manual.

Scholastic Standing/Academic Review
The academic records of all graduate nursing students are reviewed by the College of Nursing Graduate Program Office at the end of every semester. This office is responsible for enforcing the academic policies set forth in the University Manual, the Graduate School Manual and the College of Nursing Graduate Student Handbooks.

University Withdrawal (voluntary)
Students may withdraw from College of Nursing and URI at any time. Graduate students who wish to withdraw from the University and College of Nursing must notify the CON Graduate Program Office, complete the Withdrawal form found on the Enrollment Services website and forward it to the Dean of the Graduate School for his/her signature.

Leave of Absence (LOA)
Students who must leave the University for a period of one semester or more, whether due to military service, illness, childbirth, adoption, financial hardship or other circumstances, should apply for a Leave of Absence. The student should contact the CON Graduate Program Office first. If approved, the CON Associate Dean for Graduate Programs & Research will sign off on the LOA form.
The formal request for LOA is then made by the student, in writing, to the Dean of the Graduate School, accompanied by the Leave of Absence form that has been endorsed by the CON Associate Dean. The written petition should be sufficiently specific so that the Dean of the Graduate School can determine whether or not the LOA is warranted. A LOA can be requested for one year or less. LOA requests must be submitted before the last day to add courses in the URI calendar. (See GSM 4.30).

**Continuous Enrollment**

Graduate students must remain continuously enrolled in one or more graduate-level credits until all requirements are met and they have received their degrees. Please see Graduate School Manual Section 4.40 for information related to continuous registration (CRG 999) for 1 credit each semester, after all coursework and dissertation credits are completed, until graduation. CRG 999 may only be registered for when all other coursework has been completed.

**Non-Matriculating Students**

As is described in the Graduate School Manual Section 3.30, individuals holding a baccalaureate degree who are not students in a graduate degree program may take graduate level courses during the academic year or in the summer as non-matriculating students. Non-matriculating students who wish to enroll in a graduate course in the College of Nursing must obtain permission from the CON Graduate Program Office prior to enrolling. Non-matriculating students may take a maximum of two graduate-level courses in the College of Nursing without matriculating.

**Notes:** Non-matriculating students do not have the privileges regularly enjoyed by students in a degree program (see GSM Section 3.32). Non-matriculating students are not eligible for financial aid or assistantships. Enrollment in courses as a non-matriculating student does not imply acceptance or enrollment in any University graduate program.

**Transfer Credit**

PhD students who already have a master’s degree may transfer in a maximum of 6 to 9 advanced standing credits to apply towards their degree, with the permission of the CON Associate Dean for Graduate Programs & Research and the Dean/Interim Dean of the Graduate School. These include credits taken as a non-matriculating student at URI or course credit being transferred in from another university. Please refer to Graduate School Manual Section 3.33. Any credits transferred in to apply towards the degree may not have been used to fulfill the requirements for another degree and must have been earned within the past seven years.
Academic Integrity & Plagiarism
The College of Nursing and its Graduate Programs adhere to the university’s standards regarding academic integrity. The University Manual and the Graduate School Manual (See GSM A.13) list the expectations of the University concerning academic integrity as follows:

“Students are expected to be honest in all academic work. Cheating is the claiming of credit for work not done independently without giving credit for aid received, or any unauthorized communication during examinations.” (See UM 8.27.10) “A student’s name on any written exercise (theme, report, notebook, paper, examination) shall be regarded as assurance that the work is the result of the student’s own thought and study, stated in the student’s own words and produced without assistance, except as quotation marks, references, and footnotes acknowledge the use of other sources of assistance. Occasionally, students may be authorized to work jointly, but such effort must be indicated as joint on the work submitted. Submitting the same paper for more than one course is considered a breach of academic integrity unless prior approval is given by the instructors.” (See UM 8.27.11.)

“In preparing papers or themes, a student often needs or is required to employ sources of information or opinion. All such sources used in preparing to write or in writing a paper shall be listed in the bibliography. It is not necessary to give footnote references for specific facts which are common knowledge and have obtained general agreement. However, facts, observations and opinions which are new discoveries or are debatable shall be identified with correct footnote references even when restated in the student’s own words. Material taken word for word from the written or oral statement of another person must be enclosed in quotation marks or otherwise clearly distinguished from the body of the text and the source cited. Paraphrasing or summarizing the contents of another’s work usually is acceptable if the source is clearly identified but does not constitute independent work and may be rejected by the instructor.” (See UM 8.27.12, GSM A.13.4)

Assignments, homework and reports of investigations or experiments shall meet the same standards as all other written work. If any work is done jointly, this must be acknowledged in the report. “Obviously, it is dishonest to falsify or invent data.” “Written work presented as personal creation is assumed to involve no assistance other than incidental criticism from others.” (See UM 8.27.13 - 14).

“In writing examinations, the student shall respond entirely on the basis of the student’s own capacity without any assistance except that authorized by the instructor.” (See UM 8.27.15.) “Instructors shall have the explicit duty to take action in known cases of cheating or plagiarism. The instructor shall have the right to fail a student on the assignment on which the instructor has determined that a student has cheated or plagiarized. The circumstances of this failure shall be reported to the CON Associate Dean for Graduate Programs & Research. The student may appeal the
matter to the instructor’s dean, and the decision by the dean shall be expeditious and final. “If the violation warrants more severe censure, the instructor may recommend additional action to the instructor’s dean. Upon this recommendation the dean may authorize the instructor to fail the student in the course. The student or instructor may appeal the dean’s decision to the Provost and Vice President for Academic Affairs whose decision on the appeal shall be final.” (See UM 8.27.18. For further information, please see Sections 9.18.10 – 9.25.10 of the University Manual.)
VI. Policies Related to General Conduct & Professionalism

General Principles
Life in the academic community must be one of integrity, honesty, acceptance of responsibility, and a willingness to clearly and accurately represent oneself, one's work, and one's activities. The College of Nursing believes that professional conduct is critical to the practice of nursing, and fully supports the University policies and the ANA Code of Ethics presented in the *ANA Code of Ethics for Nurses with Interpretive Statements* (ANA, 2015). Students are expected to observe the standards of professional conduct and ethics in all settings. Students are expected to conduct themselves as representatives of the profession, the College of Nursing, and the University. Failure to meet these may make one subject to suspension or dismissal from the College of Nursing. Professional conduct and civility are expected and required at all times. Bullying, threatening, yelling, verbal and/or physical assaults and other types of intimidating behavior will not be tolerated. Anyone exhibiting these types of behaviors may be subject to suspension or dismissal from the College of Nursing.

The commission of illegal or unprofessional actions is also prohibited, including but not limited to violations of HIPPA or privacy regulations, illegal drug sales, possession or use, chemical impairment, violation of other state or federal laws, and/or sexual assault or sexual harassment.

Involuntary Class Withdrawal
Breach of professionalism is a serious offense which will be dealt with firmly. The College of Nursing reserves the right to remove (involuntarily withdraw) a student from a course for a minimum of one day or up to the remainder of the semester in the event it is determined that a student’s behavior or actions violate essential program or professional standards or requirements, threaten harm to self or others, and/or indicate that the student is not fit to continue. The student will be required to attend a mandatory meeting with the CON Associate Dean for Graduate Programs & Research to discuss the incident or problematic behavior.
Non-Academic Suspension or Dismissal from a Program
In the event it is determined that a student’s behavior or actions violate essential program or professional standards or requirements and/or indicate that the student is not fit to continue in the program, the CON may suspend or dismiss a student. The College will normally provide notification to the student of the reasons for the contemplated suspension or dismissal and give the student an opportunity to address those reasons before the College deliberates and makes a final decision to suspend or dismiss the student. The nature of the opportunity provided to the student (e.g., a less formal meeting with a College administrator, or a more formal hearing before multiple College officials or a panel, etc.) will depend on the nature and duration of the sanction and the reasons for the contemplated suspension or dismissal and other relevant factors. The College reserves the right to immediately suspend the student if the student’s continuation in the program constitutes an imminent risk to the student or to other students in the program, or for other compelling reasons.

Diversity and Inclusion
The CON embraces diversity and understands that each student brings unique experiences, strengths, and ideas to our classroom. These differences can be along dimensions of race, ethnicity, sexual orientation, gender, socioeconomic status, age, ability, religious or political beliefs, or other differences in lived experiences and/or ideologies. The inclusion and valuing of these differences enriches learning and in and out of our classrooms. Each member of the University has the responsibility to foster an environment of inclusion, acceptance, mutual respect and understanding.

Anti-Bias Statement
At URI and the CON, we respect the rights and dignity of each individual and group. We reject prejudice and intolerance, and we work to understand differences. We believe that equity and inclusion are critical components for campus community members to thrive. If you are a target or a witness of a bias incident, you are encouraged to submit a report to the URI Bias Response Team at www.uri.edu/brt. There you will also find people and resources to help.

Tobacco Policy
The College of Nursing (CON) is dedicated to maintaining a healthy work and learning environment. While the College already prohibits smoking inside its buildings and facilities, the CON policy prohibits smoking or use of tobacco products by students at any time when representing the College of Nursing.
Alcohol and Drug Policy
Violation of the University’s drug and alcohol policies prohibiting illegal use or possession of any controlled substance without a prescription while enrolled in The College of Nursing is considered a serious offense and may result in suspension or dismissal.

Social Media Policy
Social media are web-based or mobile technologies used for interactive communication. Examples of social media include, but are not limited to, collaborative projects (e.g., Wikipedia), blogs and microblogs (e.g., Twitter), content communities (e.g., YouTube), social networking sites (Facebook, Instagram, SnapChat), and virtual social worlds (e.g., Second Life).

CON students, faculty and staff must always protect individuals’ rights to privacy and confidentiality, and communicate sensitive and confidential information in accordance with all applicable laws, regulations and policies (including the policies of clinical training sites), including the requirements of the Health Insurance Portability and Accountability Act (HIPAA) and the Family Educational Rights and Privacy Act (FERPA) when applicable. Members of the CON community are expected to observe the American Nurses Association’s Principles for Social Networking:

ANA’s Principles for Social Networking (https://www.nursingworld.org/social/)
1. Nurses must not transmit or place online individually identifiable patient information.
2. Nurses must observe ethically prescribed professional patient-nurse boundaries.
3. Nurses should understand that patients, colleagues, institutions, and employers may view postings.
4. Nurses should take advantage of privacy settings and seek to separate personal and professional information online.
5. Nurses should bring content that could harm a patient’s privacy, rights, or welfare to the attention of appropriate authorities.
6. Nurses should participate in developing institutional policies governing online conduct.

The policy requires that all:
- Be aware of maintaining professional boundaries while using electronic media.
- Follow applicable HIPAA regulations at all times. Identifiable information concerning patients/clinical activities must not be posted in any online forum.
- Protect confidential, sensitive and proprietary information. Do not share or post any information related to nurse-patient contact or about the College of Nursing.
- Do not post comments on social media sites about patients, clinical facilities, employees of facilities, faculty or other students as these posts violate the individual’s right to privacy and may incur liability - even if the posts do not specifically identify individuals.
• Do not make disparaging remarks about patients, employers, or co-workers, even if they are not identified.
• Do not use mobile devices to take photos or videos of patients or patient information.
• Use personal electronic devices only as authorized by faculty and clinical affiliates.
• Report any breach of confidentiality or privacy to a College of Nursing administrator or faculty member.

**Accommodations for Qualified Students with Disabilities**
Students are expected to notify faculty at the onset of the semester if any special considerations are required in the classroom or clinical setting. If any special considerations are required, it is expected that the student will notify the faculty with the appropriate paperwork from Disability Services (http://web.uri.edu/disability/).

**Computer Lab and Printing Policy**
For quiet, individual work, there is a student computer lab located in White Hall (Room 201) available to nursing PhD students. Students are expected to behave with courtesy and respect toward fellow students and equipment. Hours of operation are posted outside the door. All files left on the computers will be purged. Printing is made available to all nursing students at the Rhode Island Nursing Education Center (RINEC). The student printing station within the RINEC Second Floor URI Faculty suite uses URI’s pay for print system (https://web.uri.edu/cma/payforprint/).

**PhD Student Lounge and Work Space**
The graduate student lounge is located on the second floor of the RINEC. Cubicles are available as PhD student work space on the RINEC second floor immediately after the entrance to the URI faculty office area. In addition, offices 257, 259 and 260 are set aside as “hotel space” for faculty who do not have offices in the RINEC. PhD students may use these offices on a space available basis, provided that faculty and TAs do not need them to meet privately with students.

**Email Policy**
All email communications to students by the College, or its faculty and staff, will be via the URI email system, with communications sent to the students’ URI assigned email address. Students are also required to use their University of Rhode Island email account for all communications with College faculty or staff. Students are expected to obtain a URI email account as soon as possible and frequently monitor their URI email for announcements. Faculty and staff email addresses may be obtained by searching the directory on URI’s website (https://directory.uri.edu/).
Brightspace
The College of Nursing – Grad Student Resource Brightspace site serves as a communication portal between CON graduate students, faculty and administrators. Important information such as research opportunities, events, job postings, important dates, deadlines, and graduation information will be shared through this site. It is important that you become familiar with Brightspace and check the College of Nursing site frequently.
APPENDICES

Appendix A: Summary of PhD Program Sequence

Appendix B: Graduate Student Forms & Links

Appendix C: Recommendations for PhD Student Success
Appendix A: Summary of PhD Program Sequence

a. Acceptance into the PhD Program
b. Assignment of Faculty Advisor
   The Associate Dean assigns initial advisors based upon the “fit” and shared interests of faculty and student and the expertise and willingness of the faculty member. Students are able to change advisors at any point in their program of study; students select their major professor who may or may not be their originally assigned faculty advisor.

c. Advisement and registration for first semester courses
   Ideally, students should consult with their advisor prior to registering if she/he is available. However, faculty may not be available in the summer. The Associate Dean and Graduate Program staff are available in the summer and can meet with new PhD students and assist them with registering for first semester courses.

d. Meeting with faculty advisor / major professor and development of program of study
   Students should meet with their faculty advisor during the first semester and with the major professor regularly thereafter. The individual program of study should be developed, signed and submitted to the Graduate Program Office no later than the second semester. After review and sign-off by the CON Associate Dean, the program of study is submitted to the Graduate School.

e. Required and elective courses are completed during the first 2 – 3 years of full-time study.
   Students should also engage in other scholarly activities (e.g., papers, pilot studies, small grants) during this time. Please see Appendix D.

f. The PhD comprehensive examination is scheduled and completed.
g. The dissertation proposal is developed and defended.
h. IRB approval is obtained
i. Abbreviated dissertation proposal is submitted for CON and Graduate School approval
   The abbreviated proposal (maximum = 15 pages) is approved by the committee and submitted to the CON Graduate Associate Dean for review. After CON sign-off, the proposal is submitted to the Graduate School for formal approval by the Graduate School Dean.

j. Dissertation research is conducted
k. Dissertation is written and deemed defendable by the dissertation committee
l. Oral defense of the dissertation is scheduled and conducted
m. Successful defense may be followed by final edits
n. Final dissertation is approved and submitted
Appendix B: PhD Program Forms & Links

Forms for graduate students and information on how to submit forms using the TransForm system are located at: https://web.uri.edu/graduate-school/forms/. Forms are also listed on the CON Graduate Student Sakai site.

Examples of dissertation front pages (e.g., title page, signature page) are included in the Graduate School document titled, “Thesis/Dissertation: From Proposal to Defense,” that can be found at https://web.uri.edu/graduate-school/files/ThesisDissertationProcess.pdf. A copy of this document is also provided on the CON Graduate Student Sakai site.

CON Graduate Student Sakai site / Resource Page is located on the lower right hand side of your Sakai page: https://sakai.uri.edu/portal . The direct link is: https://sakai.uri.edu/portal/site/5418f97c-4ecb-48a1-881d-e5311243fb57

The URI Manual is located at: https://web.uri.edu/manual/

The URI Graduate School Manual is located at: https://web.uri.edu/graduate-manual/

Information about the NIH pre-doctoral fellowships (i.e., Ruth L. Kirschstein NRSA fellowship awards) can be found at: https://grants.nih.gov/grants/guide/pa-files/PA-19-195.html . This is a reissue of PA-18-671.

Information about NIH requirements on training in the responsible conduct (required for all NRSA applicants) can be found at NOT-OD-16-122.
