General Education: General education consists of 40 credits. Each of the outcomes must be met by at least 3 credits. A single course may meet more than one outcome but cannot be double counted towards the 40-credit total. No more than twelve credits used to meet general education may be from the same course code, with the exception of honors HPR courses, which may have more than 12 credits. General education courses may also be used to meet requirements of the major or minor when appropriate.
