

PA Applicant Data

This dashboard presents PA program applicant data from the 2022-2023, 2023-2024, and 2024-2025 application cycles. Data is sourced from the Centralized Application Service for Physician Assistants (CASPA) within the Liaison Universal Advisor Portal (UAP), and includes metrics such as GPA ranges, GRE scores (if applicable, GRE is not required for most PA program applications), and acceptance rates. Figures are subject to updates based on data availability and reporting standards.

Applying to PA programs can be highly competitive and nuanced. This dashboard provides a clear view of recent University of Rhode Island applicant trends, including academic benchmarks and admissions outcomes. These insights help guide academic planning and preparation by showing how past applicants have aligned with admissions expectations.
