Older Adults at Risk for Opioid-Induced Respiratory Depression

Tuesday, August 16, 2022  |  8:05–9:05 AM

Learning Objectives:

After completing this webinar, participants will be able to:

1. Identify older adults at risk of an opioid-involved breathing emergency.
2. Describe barriers that exist to accessing naloxone, buprenorphine and/or methadone in the community and long-term care settings.
3. Implement strategies to reduce harm from opioid dependence, withdrawal, and use of unregulated substances.

Anita Jacobson, PharmD
Clinical Associate Professor
College of Pharmacy
University of Rhode Island

This activity has been submitted to the Northeast Multi-State Division, an accredited approver by the American Nurses Credentialing Center’s Commission on Accreditation, and the Rhode Island College School of Social Work for 1.0 contact hours.
