# THE OPEN NEWSROOM

MAY 26 - AUGUST 14, 2026

*A fellowship for undergraduates to explore science-related issues impacting their communities via local news*

## OVERVIEW

Engaging local communities through inclusive and solutions-based journalism can be a powerful experience as one tells human stories around science and research. During this **12-week, paid fellowship**, undergraduates will become local reporters and develop a deeper understanding of science issues facing RI communities. Through their work, Open Newsroom fellows will support public conversations about research and its role in society and culture.
