Webinar Coordinator

Presentation by:
Amanda Basse
We exist to train, educate, and support entrepreneurs of both new (pre-venture) and established small businesses. Positioned within the nationwide network of SBDCs, we offer resources, key connections at the state and national level, workshops, and online and in-person support that equips us to help Ocean State entrepreneurs reach the next level of growth.
What is AI Marketing?

AI marketing is artificial intelligence used to create content, edit videos, task automation and gather customer insights to increase user engagement, increase sales and build a loyal following.

This can look like email sequences, chatbots, content creations, and targeted ads.
Not Just Another Thing for Your to Learn

What AI won’t do: Replace Humans!

What AI WILL do: Make your more efficient and assist with your never ending marketing task list
Who is Using AI?
A Poll from Neil Patel

Who Is Using AI Marketing Right Now?

When we polled 1000 U.S. digital marketers, here's what they said about their use of AI in marketing:

- 291 are very likely to use AI in their digital marketing campaigns
- 209 are already using AI
- 199 are somewhat likely to use AI
- 152 are not likely to use AI
- 149 said they would never use AI in their digital marketing campaigns

Source: Neil Patel
Is AI Ending the Marketing Industry?

My opinion is not at all.
Golden Rule of Using AI
Inputs = Outputs

AI can make your marketing load much easier to carry.

As with any skill, the better you get at doing something, the greater your results.

This is also true for using your prompts to get AI to give you answers.

Specific inputs help the AI to create content that doesn't sound bland.
Beginner vs Advanced

Example Topics

**Basic**
Driving Revenue Growth

**Intermediate**
We are working to drive revenue growth this year. The top three metrics we use to track performance are sales revenue, deals closed and number of new customers

**Advanced**
Topic: Driving Revenue Growth

Metric: Total sales revenue, total deals closed, total number of new customers

Problem: Poor customer segmentation, lack of focus on customer experience, inadequate sales processes

Solution: Customer segmentation and targeting, improved customer experience, efficient sales process

Captions
Captions.ai

The all-in-one AI powered creator studio

Life, Camera, Action

Say hello to Captions, the only camera and editing app that automatically transcribes, captions and clips your talking videos for you.

Source: captions

$9.99 monthly
$54 yearly
All in One Video Editing

**TEXT STYLES**
Add text, add style.
Stand out with flair, select the perfect fonts and text styles.

**RECORD**
No typing, just talking.
Speak to the camera. We'll take care of the rest.

**CAPTION**
Word-by-word captions, synchronized with your voice.
You're not boring. Your captions shouldn't be, either.
Eye Contact

Make contact, without eye contact

Reading off of a teleprompter or script? No stress. You can adjust your video after recording and create natural eye contact with your audience.
Create Amazing Copy in Seconds

For Your Ads

And generate leads, sell more & scale up your marketing... Without having to be a copywriter or sales expert

Get Started Now

Priority Access to ChatGPT4 is now INCLUDED with every LeadScripts account!
What Does LeadScripts Do?

  - Priority Support
  - Renews at $99/month
Create amazing marketing copy 10X faster with AI.

Jasper is the AI Content Platform that helps you and your team break through creative blocks to create amazing, original content 10X faster.
What Does Jasper Do?

Jasper is an advanced AI marketing tool intended to create high-quality ad copy, emails, landing pages, articles, or social media posts.

It also has built-in templates for AIDA, Feature to Benefit, PAS, and Before-After-Bridge Framework. All you need to do is add your brand name or product, and it will generate the copy for you.

E-commerce shops can also produce product descriptions using this powerful AI. It can generate Amazon product bullet points or descriptions as well as write titles and meta descriptions at a click of a button.

How to Find the Best ChatGPT Prompts

1. **Be specific**: Provide clear and specific details about what you are looking for. The more specific your query is, the better ChatGPT can understand and generate accurate responses.

2. **Use context**: Include relevant context or background information in your prompt. This can help ChatGPT understand the context of your query and provide more relevant and accurate results.

3. **Experiment with different formats**: Try different prompt formats to see what works best. You can start with a direct question, provide partial information, or frame your prompt as a conversation. Experimentation can help you find the most effective format for your specific needs.
4. **Iterate and refine**: If the initial results are not satisfactory, iterate and refine your prompts. Experiment with different wording, structure, or additional details to improve the accuracy and relevance of the responses.

5. **Utilize system instructions**: Consider using system-level instructions to guide ChatGPT's behavior. For example, you can specify the tone, format, or style you prefer in the response.

6. **Incorporate examples**: Include specific examples related to your query to provide further clarity and context. Examples can help ChatGPT understand your requirements and generate more relevant responses.
7. **Practice active learning:** Engage in an iterative conversation with ChatGPT. Ask follow-up questions or provide feedback to guide the model towards generating more accurate and desired responses.

Remember that ChatGPT's responses are generated based on the input it receives, and it may not always provide perfect or complete answers. Experimentation, refinement, and active engagement can help you achieve the best results for your search queries.
Plan a Trip

Whether looking for a new place to travel or things to do in a destination, ChatGPT can help you.
Prompts:
"explain [something] in the simplest way possible;"

If the results are still too complex, ask ChatGPT to explain it like it would to a 10-year-old.

You can follow up with "show the results in bullet points" to make the answers more organized.
Create / Draft Content

Do NOT copy and past content as is. Make sure to edit and make it your own.

Product Descriptions
Reviews
Social Media
Emails
Stuck on Video Marketing?

Use ChatGPT to write your scripts.
Debug, Write and Explain Code

Using machine learning algorithms, Chat GPT can analyze and understand code snippets and generate new code based on the input it receives.

You can also input code and ask ChatGPT to find the bug. Your results explain what the bug is, and an example (or more) of how you can implement a potential fix.

**Default organization**

If you belong to multiple organizations, this setting controls which organization is used by default when making requests with the API keys above.
Workout Plans

1. Program duration. Do you want a 4 week, 6 week, 90 day or longer program?
2. Enter details like heights, weight,
3. How many days per week you want to work out.
4. Do you have a focus? Are you looking for muscle gain, weight loss, etc
5. Will your workouts be at home or at the gym. What equipment do you have?
6. Do you have any injuries?
Meal Planning

1. How long do you want your meal plan to be? You can choose one week, five days, one month, etc.
2. How many daily meals do you want to plan for? Do you want to plan three daily meals and a snack, only for dinner, etc?
3. How many people are you cooking for? Are you cooking for a family of four? Or are you cooking for two but want extra leftovers?
4. How long do you want to spend cooking each meal?
5. Enter your budget if you want to stay within a dollar amount?
6. Do you have any dietary restrictions or allergies?
Play Trivia

1. Tell ChatGPT you want to play
2. Specify the topic or theme you’d like to focus on
3. ChatGPT will generate questions for you to answer.
4. Or, you can challenge ChatGPT with your own trivia questions.
Conclusion
What ways have you thought of that you can use AI to ease your marketing load?

There are AI products for:
- Video Marketing
- SEO
- Content Creation
- Scripts
- Blogging
- Calculating Using Sheets
Input = Output

The better your input, the better your outputs.
