Prelog Introduction

The Prelog application is administered and maintained by the Rhode Island State Crime Laboratory (RISCL). The web-based application provides a means for law enforcement agency personnel in Rhode Island to record or "log" Evidence into the web-based portal prior to delivery to the crime laboratory. The Prelog process benefits both the laboratory and the law enforcement agency by offering several services:

- Time spent at the laboratory delivering cases will be reduced.
- Law enforcement personnel can use the portal to view the status of evidence delivered to the laboratory. Users may learn:
 - if evidence items have been Prelog
 - if the laboratory has received evidence items
 - if a laboratory analyst has been assigned to the case
 - if a report has been written, etc.
- Law enforcement personnel can download and store electronic copies of approved laboratory reports.
- Law enforcement personnel can query Prelog cases by various criteria, including location, P.D. case number, case officer's name, RISCL lab case number, submitting officer's name, offense type, or the date the case was completed.

All evidence packaging requirements remain in effect as defined by the RISCL. Please consult the Operations Manual's Evidence Submission Manual for the evidence packaging requirements/guidelines.

RISCL provides one user name and password per law enforcement officer. The law enforcement agency is responsible for determining which personnel will have access to the web portal. Any individual with a valid agency user name and password for the web portal will be able to access all of their designated department information on the portal and will also be able to read and download any reports available to the agency.

There are four steps to create an electronic submission entry in the Laboratory Information Management System (LIMS):

1. Enter case information
2. Enter case names
3. Enter case items
4. Prepare lab submission

Once submitted into Prelog, a Laboratory Analysis Evidence Submission Form **must** be printed. This form contains a barcode that represents the submission information. The Laboratory Analysis Evidence Submission Form **must** accompany the evidence to the laboratory.
