

Assignments: In total there are 10 quizzes, 5 labs, and 5 exams during the term.

Description of Assignments:

Quizzes: Each Module will have its own associated quiz reviewing key concepts and ideas from the readings and videos. These will help to assess the understanding of material to date. You have 3 attempts for each quiz.

Labs: Over the course of the 5 weeks students will work through 5 distinct lab assignments using the Observe With NASA (OWN) website and its JS9 software. Each lab can be done without assistance, but if help is needed attend the TA's 5-7 PM office hours held Monday through Friday. Your lab grade is the average of your 5 lab scores.

Exams: These are similar to quizzes but with only 2 attempts. Each attempt will have a random shuffling of questions.

QUIZZES / EXAMS NOT SUBMITTED BY THE DEADLINE WILL RECEIVE A GRADE OF ZERO.

Learning Outcomes:

- 1: Describing the evolution of modern astronomical thoughts on the solar system from antiquity to modern times.
- 2: Exploring the different regimes of the electromagnetic spectrum and radioactivity.
- 3: Summarizing the strengths and weaknesses of modern telescopes and telescope technology.
- 4: Contrasting information currently known on the bodies of the solar system to produce a modern theory of comparative planetology.
- 5: Analyzing the bodies of the solar system for the potential for life.
- 6: Identifying the differences between different types of stars.
- 7: Integrating knowledge built across the class to consider the potential for extra-terrestrial life.

Technology Requirements: Computer access to the internet is required in order to successfully navigate this course. Firefox is the recommended browser for Brightspace compatibility and can be downloaded free from www.mozilla.com/firefox. You will require additional plug-ins. These include:

Adobe Reader: <https://get.adobe.com/reader/otherversions/>

Adobe Flash: <https://get.adobe.com/flashplayer/>

These are all free downloads. Internet Explorer for Windows, version 6 or higher is also an option, as are:

Chrome: <https://www.google.com/chrome/>

Chromium: <https://www.chromium.org/getting-involved/download-chromium>

Make certain to turn off pop-up blocker. You will also need a word processing or typesetting program to submit your work with. While there are too many programs to list here most students defer to Microsoft Office, which is not a free download, or LibreOffice, which can be found at: <https://www.libreoffice.org/download/download/>

In order to view videos sent in the class, it is recommended to download VLC Player: <https://www.videolan.org/vlc/>

Finally, you will need to have access to a functional email account to use for communication over the term.

Online Learning: As stated above, the best way to begin this course is to click the **START HERE** link, read the syllabus, and complete the orientation process it walks you through. In addition, you can find more helpful information at this site:

web.uri.edu/learningonline/intro/

This course is divided into five weeks with six days of study and one day of examination per week. Each Week on Brightspace contains the assigned readings, videos, and links to other important content on the internet, written assignments, quizzes, and discussion activities.

Rubric for Success in this Course:

- 1: Be active in online discussions and keep on top of the pace of the course and its assignments while being thoughtfully engaged at all times.
- 2: Work through all study questions.
- 3: Fully understand all study questions.
- 4: Conceptual understanding will reap tremendous results in this course. Memorization will not.
- 5: Seek help when you cannot complete homework questions or understand course content.
- 6: Help comes in many forms:
 - a: Emailing me directly, as discussed above.
 - b: Dinusha Senarathna is the TA for this course. You can reach him via email at dinusha@uri.edu.
 - c: Working in student groups. Group work in class is **always** encouraged. Use of other online methods for communication beyond the spectrum of the course is highly encouraged.

The only caveat to group work is that you be able to understand and explain all concepts independent of the group.

Academic Support Services:

Accommodations for Special Needs:

Section 504 of the Rehabilitation act of 1973 and the Americans with Disabilities Act of 1990 require the University of Rhode Island to provide academic adjustments or the accommodations for students with documented disabilities. The student with a disability shall be responsible for self-identification to the Disability Services for Students in the Office of Student Life, providing appropriate documentation of disability, requesting accommodation in a timely manner, and follow-through regarding accommodations requested.

It is the student's responsibility to make arrangements for any special needs and the instructor's responsibility to accommodate them with the assistance of the Office of Disability Services for Students.

Academic Enhancement Center:

The work in this course is complex and intensive. To do the best you can, it's a good idea to visit the Academic Enhancement Center (AEC) in Roosevelt Hall. AEC staff assist students with academic skills development as well as course-based content. Options for content tutoring include: joining a Weekly Tutoring Group (for BIO, CHM, CMB, CSC, ECN, MTH, PHY, STA), stopping by a Walk-In Center (for CHM, MTH, PHY), or making a One-Time Group Appointment. AEC tutors can answer questions, clarify concepts, check understanding, and help you learn to study effectively. For a complete description of services and schedules, visit uri.edu/aec, call (401) 874-2367, or stop by the fourth floor in Roosevelt Hall.

Health and Counselling Services:

URI has on-campus health and counselling services available to students in need. Their websites are:

<https://health.uri.edu/>

<https://web.uri.edu/counseling/>

Professional Conduct:

Cheating and plagiarism are serious academic offenses, which are dealt with firmly by the College and University. Scholastic integrity presumes that students are honest in all academic work. Cheating is the failure to give credit for work not done independently (i.e., submitting a paper written by someone other than yourself), unauthorized communication during an examination, or the claiming of credit for work not done (i.e., falsifying information). Plagiarism is the failure to give credit for another person's written or oral statement, thereby falsely presuming that such work is originally and solely your own.

If you have any doubt about what constitutes plagiarism, visit the following website:

<http://gervaseprograms.georgetown.edu/hc/plagiarism.html> the URI Student Handbook, and University Manual sections on plagiarism and cheating at:

<http://www.uri.edu/facsen/8.20-8.27.html-cheating>.

Students are expected to be honest in all academic work. A student's name on any written work, quiz or exam shall be regarded as assurance that the work is the result of the student's own independent thought and study. Work should be stated in the student's own words, properly attributed to its source. Students have an obligation to know how to quote, paraphrase, summarize, cite and reference the work of others with integrity.

The following are examples of academic dishonesty:

- i: Using material, directly or paraphrasing, from published sources (print or electronic) without appropriate citation;
- ii: Claiming disproportionate credit for work not done independently;
- iii: Unauthorized possession or access to exams;
- iv: Unauthorized communication during exams;
- v: Unauthorized use of another's work or preparing work for another student;
- vi: Taking an exam for another student;
- vii: Altering or attempting to alter grades;
- viii: The use of notes or electronic devices to gain an unauthorized advantage during exams;
- ix: Fabricating or falsifying facts, data or references;
- x: Facilitating or aiding another's academic dishonesty;
- xi: Submitting the same paper for more than one course without prior approval from the Instructor.

Please note the following section from the **University Manual**:

8.27.17. Instructors shall have the explicit duty to take action in known cases of cheating or plagiarism. The instructor shall have the right to fail a student on the assignment on which the instructor has determined that a student has cheated or plagiarized. The circumstances of this failure shall be reported to the student's academic dean, the instructor's dean, and the Office of Student Life. The student may appeal the matter to the instructor's dean, and the decision by the dean shall be expeditious and final. Such action will be initiated by the instructor if it is determined that any written assignment is copied or falsified or inappropriately referenced.

Any good writer's handbook as well as reputable online resources will offer help on matters of plagiarism and instruct you on how to acknowledge source material. If you need more help understanding when to cite something or how to indicate your references, PLEASE ASK.

Please note: Students are responsible for being familiar with and adhering to the published "Community Standards of Behavior: University Policies and Regulations" which can be accessed in the University Student Handbook.
