

Snow Emergency Parking Guidelines for Resident with Cars on Campus

During active snowstorms or snow parking bans, only resident permit holders are allowed to park in their designated lots; this includes weekends and holidays. Due to the difficulty of removing snow around vehicles, only the parking lot aisles are plowed at the resident student lots. Each permit holder is responsible for clearing snow from around their vehicle. Transportation and Parking staff cannot shovel out any vehicles.

It may be necessary for resident students to move their cars to facilitate snow removal. This notification will be made through the Resident Director (RD) on duty who sends out information via e-mail to residents. The content of the e-mail is from the Facilities Management Department. Resident students will be asked to move their cars temporarily while resident lots are cleared. Instructions and timelines will be provided via the methods outlined above.

During the winter weather season, it is advisable for ALL permit holders to maintain ice scrapers and shovels in their vehicles to assist in moving from one lot to another and back again when the lot is cleared. Please park in clusters next to other cars. This allows Lands and Grounds to plow open areas faster and easier.
