Monitoring is scheduled for every other week, but you may monitor weekly. **Monitor between 6 AM and 9 AM**, except on the water collection days. Approximate times listed are for when Narrow River monitors collect water samples (aimed toward low tide). Other rivers/streams should collect samples by 9 AM. Samples may be collected and delivered on any of the four days, usually Wednesday through Saturday (10 AM - 3 PM). **It is better to collect the water samples earlier rather than later.** After collection immediately bring the samples on ice in a cooler to the Coastal Institute in Kingston, URI. The URI Watershed Watch lab phone number is 401-874-2905, email eherron@uri.edu, or 401-874-4552 direct to Elizabeth. Please notify us at least 1 day in advance if you must reschedule delivery of water samples to a different date. An earlier date is much preferable to one after the designated collection period. Let us know if you want to drop off your samples on the cart outside instead of coming into the lab.

Have a great season and remember to monitor safely!
