Thank you to our GOLD sponsors

The Power of Precision

At SCIEX, we provide mass spectrometry expertise, as well as hardware and software solutions to help scientists add to our collective understanding of PFAS.

Wellington Laboratories Inc. is a producer of quality certified reference standards for environmental analysis including native and mass-labeled PFAS.

Thank you to our SILVER Sponsors

Open access environmental science and technology, including pure, applied, experimental and theoretical interdisciplinary research.

Open access environmental science and technology, including pure, applied, experimental and theoretical interdisciplinary research.

Science & Technology publishes robust and impactful papers for a multidisciplinary audience of scientists, policy makers and the broad environmental community.

Environmental Science & Technology Letters is at the forefront of disseminating timely, urgent and high-quality communications on all aspects of environmental science and technology, both pure and applied.

MACHEREY-NAGEL stands for high quality, innovation and reliability in chemical and biomolecular analysis. MN has always contributed to the development of products for environmental analysis and offers laboratory solutions for the detection of various environmental toxins in air, soil and water. One focus is sample preparation and analytical detection of PFAS. As these “forever chemicals” will pollute ecosystems not only acutely, but also in the long term with still largely incalculable consequences for human health, it is important to identify the sources of PFAS. As a research based globally represented company with over 110 years of history, we consider it our duty and responsibility to future generations to provide analytical products for the active protection of our environment.

SEKISUI XenoTech is a global CRO specializing in ADME/PK and Drug-Drug Interaction services and test systems utilized by 98% of top pharma and countless others.

Thermo Fisher Scientific Inc is the world leader in serving science. Our Mission is to enable our customers to make the world healthier, cleaner and safer. Whether our customers are accelerating life sciences research, solving complex analytical challenges, improving patient diagnostics and therapies or increasing productivity in their laboratories, we are here to support them. Our global team of more than 75,000 colleagues delivers an unrivaled combination of innovative technologies, purchasing convenience and pharmaceutical services through our industry-leading brands, including Thermo Scientific, Applied Biosystems, Invitrogen, Fisher Scientific, Unity Lab Services and Patheon. To serve science, Thermo Fisher Scientific needs to stay ahead of it. To be the world leader in serving science, we need to anticipate (pre-empt) customer needs. We need to constantly think about advancing science, so customers have the freedom to be bolder and more innovative – we are committed to pushing science and technology a step beyond where it is today. An example of this is, in March 2020, Thermo Fisher received emergency use authorization from the FDA for a test for SARS-CoV-2 to help diagnose COVID-19 as well and mitigate the global pandemic.

Thank you to our **BRONZE** Sponsors

NEIW PCC is a regional commission that helps the states of the Northeast preserve and advance water quality.
