

Fungicide Ratings for Summer Diseases of Apple

Daniel Cooley, Stockbridge School of Agriculture
University of Massachusetts Amherst

Trade Name	Rate/A	FRAC code	Ratings for Control		
			Sooty Blotch/ Flyspeck	Black/ White Rot	Bitter Rot
Captan, Captec	3 to 3.75 lb. of 80 WDG or equivalent	M4	G	S	F
Topsin M	1 lb. WSB or equiv.	M1	E	E	S
Flint Extra	2.9 fl. oz.	11	E	G	F
Sovran	6.4 oz.	11	E	G	F
Aprovia	7 fl. oz.	7	G	F	F
Sercadis	4.5 fl. oz.	7	F	F	NR
Luna Sensation	5.8 fl. oz.	11 + 7	E	G	G
Merivon	5.5 fl. oz.	11 + 7	E	G	E
Pristine	18.5 fl. oz.	11 + 7	E	G	G
Inspire Super	12 fl. oz.	3 + 9	E	NR	NR
Omega	13.8 fl. oz.	29	G	G	G
Indar	8 fl. oz.	3	F	NR	NR
Prophyte	4 pt. (plus another material)	NC	Technically not a fungicide. Adding 3 pt./A to Captan or Group 11 fungicides increases effectiveness		

There is a 77 day pre-harvest interval for the EBDC fungicides

Dithane, Manzate, Penncozeb, Maneb, Polyram	See label for different programs and formulations	M3	E	G	E
---	---	----	---	---	---

The following fungicides are registered for use on apple BUT ARE NOT REGISTERED FOR SUMMER DISEASES

Fontelis, Luna Tranquility, Procure, Rally, Rhyme/Topguard, Rubigan, Scala, Syllit, Vanguard

Key to control ratings:

NR = not registered for disease; **S** = slight, **F** = fair, **G** = good, **E** = excellent
