Fruit and Vegetable Math

Name: _____ Date: _____

DIRECTIONS:

Jason is 9 years old and just learned in school that he needs to have 2 cups of fruit and 2 cups of vegetables every day. Do the math problems below to see what Jason is eating every day.

1 CUP FRUIT=	1 CUP VEGETABLES=
32 grapes	12 baby carrots
1 large banana	1 sweet potato
1 orange	2 cups leafy greens
1 apple	1 cup cooked broccoli

1. On Monday morning Jason packed grapes to bring to school with him for a snack. He packed 40 grapes and gave 4 to Sarah and 4 to John.

    a. How many grapes does Jason have left? _____

    b. How many cups of fruit is this? _____

    c. What does Jason need to eat to reach 2 cups of fruit for the day?
       Circle the correct answer:

          ½ large banana   1 orange   2 apple slices

2. On Tuesday, Jason brought 15 baby carrots to school, but he did not eat 3 of them.

    a. How many carrots did Jason eat? _____

    b. How many cups of vegetables is this? _____

    c. At dinner, Jason ate 1 cup of leafy greens in his salad and half a sweet potato. Does Jason need to eat more vegetables to get 2 cups of vegetables for the day?
       Circle the correct answer**:**

          YES   NO

       Explain your answer: _____

       _____
