

NEW OLLI SPECIAL INTEREST GROUP

NEW

COSMIC QUESTIONS

THIS GROUP WILL DISCUSS ONLY SCIENTIFIC FACTS – NOT RELIGION OR POLITICS.

Join us as we dive into the question, “Are we god’s laboratory?
Is life on Earth the only life in the universe?”

Thursdays, from 1:00PM-2:30PM at OLLI
Sept 29, Oct 27, Nov 17, Dec 15
Free for members but you MUST register.

For the first meeting we will discuss
Extraterrestrial: The First Sign of Intelligent Life Beyond Earth,
by Avi Loeb.

In 2017, scientists from a Hawaiian observatory spotted a cigar-shaped object hurtling through our solar system. It was named ‘Oumuamua. Close observation showed that this object was accelerating as if something were propelling it. The debate among researchers – the pure facts pro and contra its extraterrestrial origin, is the subject of this book. The author Abraham (Avi) Loeb supports alien origin of ‘Oumuamua.
