

# ~ Protect your family ~

**Get vaccinated to protect your family,  
your community, and yourself from  
infection**

Ask your doctor  
or pharmacist  
about the  
vaccine that  
*protects* against  
bacterial  
pneumonia.

Bacterial pneumonia is a dangerous infection of the lungs that could cause serious disability and even death.

Vaccination - it's your best defense to protect yourself and your family.
