RI-INBRE is pleased to announce the first **RI-INBRE Virtual Seminar Series** featuring the program directors of NIH-sponsored program grants in the state of Rhode Island.

This series will be held every Thursday starting May 21.

These investigators represent the prominent group of biomedical and clinical scientists who continually mentor junior faculty and advocate for their career and professional opportunities, however, we don't have the opportunity to learn about their significant and impactful research.

The purpose of this new Seminar Series is to introduce the directors of Rhode Island's NIH program grants to the RI-INBRE Community and by doing so we recognize their outstanding contributions for the improvement of the biomedical research capacity in Rhode Island.
