CUT TEST

1. Turn on the vinyl cutter
2. Release presser bar lever on the back of machine to begin inserting vinyl
3. Line up vinyl using rulers on vinyl cutter. Be sure presser wheels are positioned overtop the texture wheels with the vinyl in between. Re-engage presser bar
4. Press ∧ button to size for roll
5. Press ∧ and ∨ buttons to move vinyl so cutting blade is close to vinyl edge
6. Bring .PDF file into Corel and select 'Import Text as Curves'
7. Size artboard to the size of your material width and desired length
8. Convert image color to 'No Fill' and pen setting to 'Hairline' black
9. Make sure image fits in art board size with .5" margins on top and bottom edge
10. File > Print. In print menu, confirm printer, Expert Pro-60. Click > Preferences. Click > Paper Tab. Set paper with to material width and desired length
11. Click OK. Click Print
