

# GERMAN IEP - Entering Class 2018 (Graduation year 2023)

The BA program in German requires a minimum of 30 credits (excluding GER 101 and 102). You must take one GER class in each semester, GER 206 before going abroad for your 4<sup>th</sup> year, at least two 400-level GER courses, and at least two courses in German Literature (at least one of those courses at the 400-level)

**Courses throughout this guide marked with an asterisk (\*) are not required, however are strongly recommended.** Please note you will need to pay a “credit overload” fee for each credit enrolled above 19 in any given semester (and need permission from your Dean’s Office to do so). Summer and Winter coursework similarly incur additional costs beyond your fall and spring semester tuition.

**General Education Outcomes** can be completed when possible, including while abroad (one GER will cover outcomes A3 and C2)

**Requirements for each College of Engineering majors can be found at:** <http://uri.edu/engineering/students/program-curriculum-check-sheets/>

## Freshman Year Fall Semester

GER 111 (or GER 101)	Intensive Beginning German I (or Beginning German I)	4 (or 3)
-------------------------	---	-------------

## Freshman Year Spring Semester

GER 112 (or GER 102)	Intensive Beginning German II (or Beginning German II)	4 (or 3)
-------------------------	---	-------------

## Sophomore Year Fall Semester

GER 113 (or GER 103)	Intensive Intermediate German I (or Intermediate German I)	4 (or 3)
GER 105*	Conversation about GER Engineering*	1

## Sophomore Year Spring Semester

GER 114 (or GER 104)	Intensive Intermediate German II (or Intermediate German II)	4 (or 3)
GER 106*	Math, Physics & SW in German	1

## Junior Year Fall Semester

GER 205	Conversation and Composition I	3
GER 201*	Studying and Living in GER I	1

## Junior Year Spring Semester

GER 206	Conversation and Composition II	3
GER 202*	Studying and Living in GER I	1

**Please note that at the end of the Junior Year, your proficiency level should be Intermediate-High on the ACTFL scale.**

GER 215* - Optional Summer School to Prepare for Going Abroad (at URI or Abroad)
--

## Semester Abroad

GER 2XX/3XX	September Intensive Language	3
GER 2XX/3XX	German Language Course	3
GER/EGR 411	Technical German Course	3
EGR 491/XXX	Engineering Course in German	3
EGR 491*	Research Project*	3
	General Education Outcome(s)*	3

## International Internship Semester

GER 315/316	Language Study Abroad	6
<p><b>Note:</b> For more information about how to prepare for your year abroad, please visit our online Preparation Abroad page and survival guides at <a href="https://web.uri.edu/iep/prepareforgermany/">https://web.uri.edu/iep/prepareforgermany/</a></p> <p>Aside from the Intensive Language Course, you have to pass at least two courses in German in order to get the six-months internship, and to keep/extend your student visa status.</p> <p>Credits completed abroad will vary by eligibility, what is offered at the partner institution, and your successful completion of the course. GER 315/316 (IBP: 497/498) are taught by URI German faculty, and will be graded.</p>		

## Senior Year Fall Semester

GER 3XX/4XX	Advanced Literature/Culture Course	3
-------------	------------------------------------	---

## Senior Year Spring Semester

GER 3XX/4XX	Advanced Literature/Culture Course	3
-------------	------------------------------------	---

### Notes for Engineering Curriculum Adjustments:

Do not deter from the prescribed engineering curriculum sheet you are following unless confirmed with your engineering advisor. The following approved adjustments correspond to the engineering-specific curriculum sheet you are following:

**Chemical Engineering:** ECN 201 should most easily fit in the Sophomore Year Fall semester (although can be taken in any Fall or Spring semester, and is normally offered in the Summer). For Pharm Track, CMB 211 should be attempted in the Sophomore year Fall semester.

**Civil Engineering:** **STA 409** should be attempted in the Junior Year Spring semester. **1 Professional Elective** should be completed during your year abroad or during a summer/winter term at URI. **CVE 355** can be taken in the Senior Year Fall Semester (your 5<sup>th</sup> year, after you return from your year abroad).

**Industrial and Systems Engineering:** take **MCE 201** in the Sophomore Year Fall Semester and **ISE 240/241** in the Sophomore Year Spring Semester
