120 Credits Total 55 Credits in Major

ABOUT THE CHEMISTRY BS DEGREE:

The BS program in Chemistry emphasizes breadth of training in Chemistry and is highly recommended if students plan to seek an MS or PhD in Chemistry. The degree also is an excellent choice for those who plan to be employed in the chemical industry, or in related industries such as the pharmaceutical industry. The BS in Chemistry is accredited by the American Chemical Society.

It is strongly recommended that WRT 104 or 106 be taken in the freshman year.

CHM 425 and 427 should be taken in the junior year by students planning research or advanced course work in organic chemistry.

Students desiring the American Chemical Society option must take BCH 581, 582, and 6 credits in undergraduate research (CHM 353).

GENERAL EDUCATION GUIDELINES: General education is 40 credits. Each of the twelve outcomes (A1-D1) must be met by at least 3 credits. A single course may meet more than one outcome, but cannot be double counted towards the 40 credit total. At least one course must be a Grand Challenge (G). No more than twelve credits can have the same course code (note- HPR courses may have more than 12 credits). General education courses may also be used to meet requirements of the major or minor when appropriate.
