NAME: \_\_\_\_\_

*The purpose of general education at the University of Rhode Island is to lay a foundation for the lifelong enrichment of the human experience and for a thoughtful and active engagement with the world around us. This foundation is built on recognition of the complex nature of the natural and human worlds. The objective of general education is to introduce students to the fundamental dimensions of this complexity and to build an appreciation of different ways of understanding it and different cultural responses to it.*

*Two of the courses taken as part of a student's general education program must be selected from courses designated by a "D". Courses approved for the "D" designation meet the requirements for the examining human differences skill area (all sections of that "D" course must include the examining human differences skill).*
