

Kinesiology studies all aspects of human movement—from the cellular level to the level of global physical cultures. The Kinesiology bachelor's degree prepares students for careers in physical education, fitness and wellness programs, clinical and hospital-based fitness and wellness centers, and cardiac rehabilitation. Students can choose from two major specializations: Pre-Professional and Applied. For more information, see http://www.uri.edu/hss/physical_education/Undergra%20Exe%20Description.html
