PROGRAM AREAS

URI Cooperative Extension programs provide information and tools to help Rhode Islanders improve their quality of life, their livelihoods, and the health of our natural environment by translating research results into science-based information people can use to create positive change.

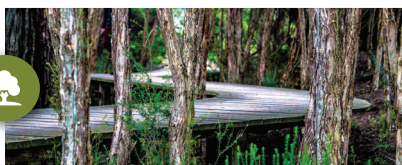

Food Systems and Agriculture—Helping farmers, food businesses, and homeowners grow and process nutritious food safely.

Healthy Lifestyles—Supporting the well-being of Rhode Islanders through healthier diets, Lyme disease prevention, and positive youth development.

Land Stewardship—Improving protection and management of Rhode Island's urban, suburban, rural, and coastal landscapes.

Water Resources—Enhancing capacity to protect and improve the quality of Rhode Island's water resources.

Energy Literacy—Strengthening Rhode Island's response to sustainable energy production and consumption challenges.
