

Materials:

None

Time:

10 -- 15 minutes

Objective:

Allows students to interact with each other and have fun!

Instructions:

Ask students to divide into two lines, one line facing the other line. Have them pair up with the person facing them. They will be given approximately 30 seconds to look at their partners, taking in all details about the individual. After 30 seconds, instruct the two lines to turn and face away from the center. One or both lines has 15-20 seconds to change something about their appearance (i.e. change a watch to different wrist, unbutton a button, remove a belt, etc.). The change must be discrete, but visible to the partner.

Then have the students turn in to face each other. They have 30 seconds to discover the physical changes that have been made.

Feel free to award points to students who correctly guessed the change, or turn this into a fun competitive game!
