

Materials:

List of Items (one list per student)

Objective:

Allows students to get to know each other better and to become more comfortable with each other. Also by having the students move around they will talk to people that they may not have on their own.

Instructions:

Distribute Human Treasure Hunt. Instruct students to move around and find people for each item, being sure to write the person's name next to the item that they match.

To prepare for this game you can ask the students to email you 2 things that are unique about them.

If there are 20 students in your class there should be 20 items on your list. Each person should sign each list one time. This way everyone has to interact with each other instead of 1 person signing five items.
