

URI Thesis and Dissertation Orientation: The Institutional Repository

Julia Lovett

Digital Initiatives Librarian

jalovett@uri.edu

How do people read your thesis or dissertation?

Two places:

ProQuest Dissertations & Theses

- The database where you submit your work. Only URI authenticated users can access this.

DigitalCommons@URI

- ProQuest then delivers the copies to the library and we upload them to the repository, DigitalCommons@URI, where it is *open to all*.

Your options for public access

When submitting to ProQuest, you can select:

- Immediate open access (most common)
- Delayed access (embargo) of 6 months, 1 year, or 2 years
- If you need more time at the end of 2 years, contact jalovett@uri.edu

Your choice of immediate or delayed release will be applied to *both* ProQuest and DigitalCommons@URI.

Important: Discuss this with your advisor!

Delayed release/embargo option

Access options (e.g., delaying the release of your work)

If you choose to delay the release of your work, access to the full text of your work will be delayed for the period of time that you specify. Th

Note: Most institutions have delayed release (or embargo) policies. Please consult with your Graduate School for more information.

Delaying release in ProQuest

I want my work to be available in **ProQuest** as soon as it is published. *

- ☐ Yes
- ☒ No - I have patents pending, or another reason why I need to delay access to the full text of my work.

How long would you like to delay the release to ProQuest? * (more info)

- ☐ 6 months ☐ 1 year ☒ 2 years ☐ Other

Note to administrator (optional)

Reason for delaying release to ProQuest: *

Patent pending ▼

What about copyright?

You as the **author** still hold the copyright.

There is no need to register the copyright.

- A note about Fair Use:
 - Theses and dissertations are now much more widely read, so be careful about use of in-copyright material
 - Guide to fair use: <https://uri.libguides.com/fairuse>

Austin Becker

Abstract

This work was motivated in part by Austin Becker's 2013 dissertation, *Building Seaport Resilience for Climate Change Adaptation: Stakeholder Perceptions of the Problems, Impacts, and Strategies*, which surveyed global port authorities' perceptions and plans for climate change adaptation and found a disconnect between perceptions of climate impacts and a lack of policies to address them. That work called for the development of a nationwide risk and vulnerability index for ports as a next step in the climate adaptation process for seaports. Climate change adaptation was found to be in the early planning phase for most ports globally, and assessing vulnerabilities is a recommended first step in risk-reduction.

In the face of climate change impacts projected over the coming century, seaport decision

SHARE

- **Example of an openly available dissertation**
- **Note the number of downloads; many more readership metrics available to authors through the Digital Commons Dashboard**

Readership Distribution

All Time: 05/29/2018 to 07/15/2020

- Create an account on digitalcommons.uri.edu with your URI email address to see this readership map
- Also see download counts, referrals, and other usage metrics

Sharing research data

- Multiple ways to share research data alongside the thesis/dissertation – either through DigitalCommons@URI, Dryad, or other data repository
- Data submitted as supplemental file(s) to ProQuest will be uploaded to DigitalCommons@URI as well
- Caveats
 - Talk to advisor and clear with IRB
- Harrison Dekker hdekker@uri.edu can advise students who want to explore this option
